IDEAL 4215

The machine is designed for cutting stacks of paper to a specified size.

This machine is constructed for "one-man operation" only!

⚠ **Warning!** Clips or similar damage the cutting blade.

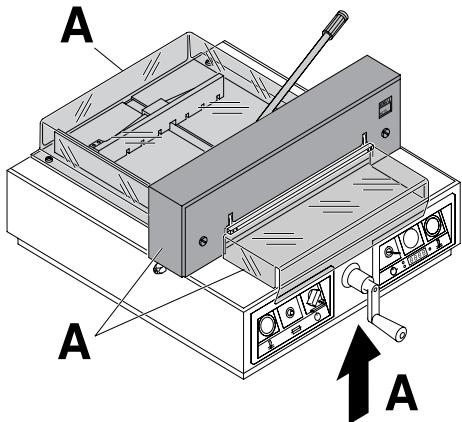

Disconnect from the mains before starting any service work or before removing the panels!

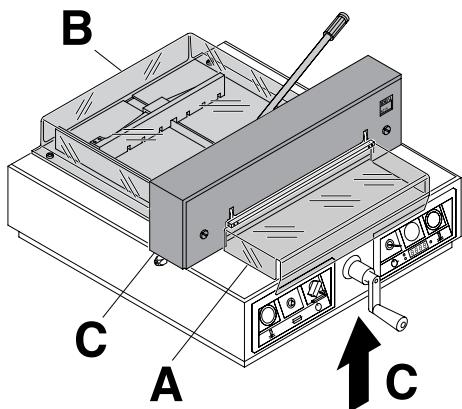

Replacement of blade and cutting stick may be performed only when the main switch is switched off!

• Safety precautions •

IDEAL

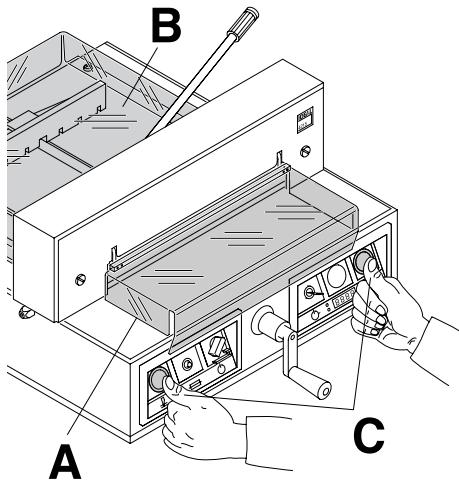

All components which could endanger the operator are covered by a guard!

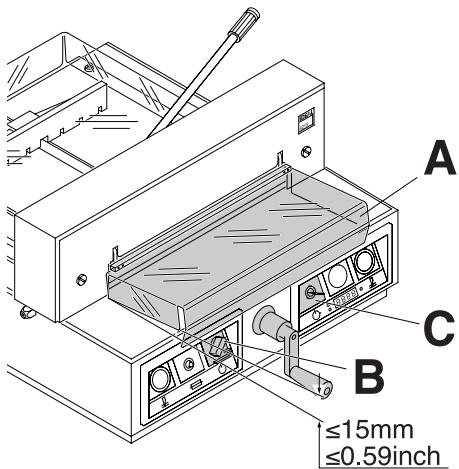

Operating the machine without safety device is forbidden!

- Movable front safety guard (A)
- rear screwed safety guard (B)
- and cover (C)

IDEAL 4215

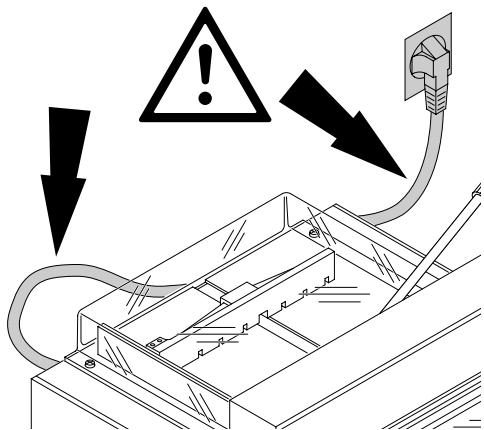

The dangerous cutting movement is safeguarded by a movable guard (A), rear screwed safety guard (B) and a safety two-handed control system! (C)

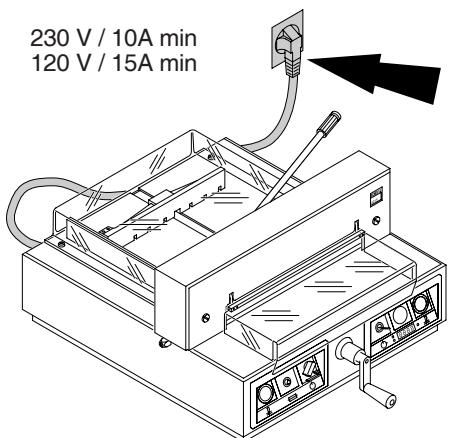

Before working with the machine and after every blade replacement the automatic cut-off function of safety guard (A),(correct if distance between cover and table is < 15 mm) main switch (B) and control panel (C) must be checked.

• Safety precautions •

IDEAL

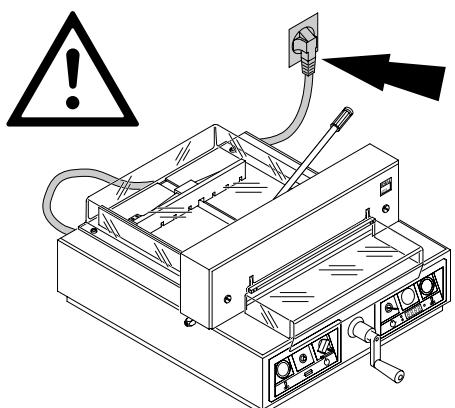

Protect mains cable against heat, oil and sharp edges!

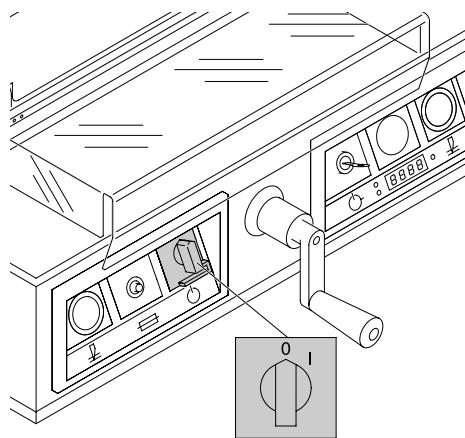

230 V / 10A min
120 V / 15A min

Connect the power cord to a single phase socket.

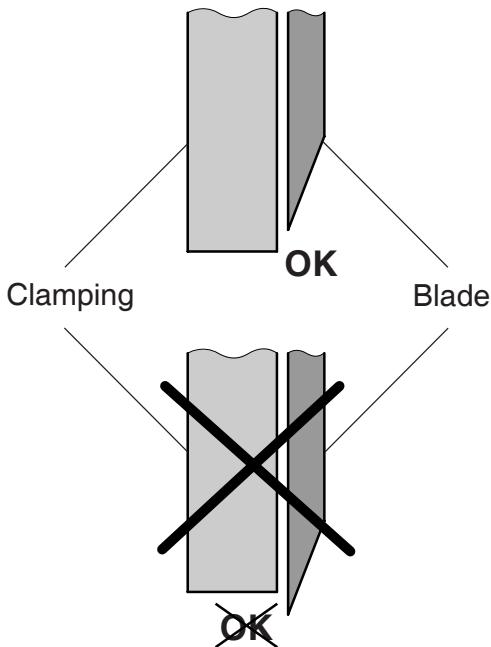

Ensure free access to mains

IDEAL 4215

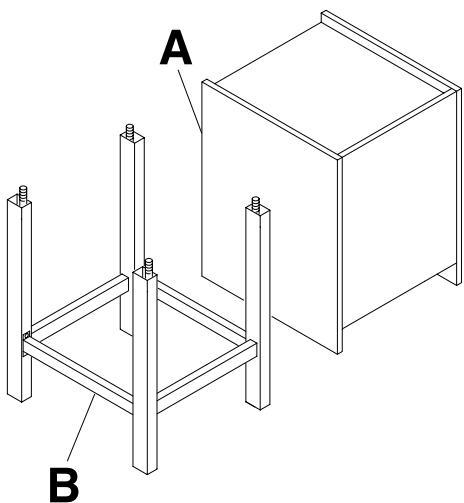

When not in use for a longer period switch off.
(Main switch to "0").

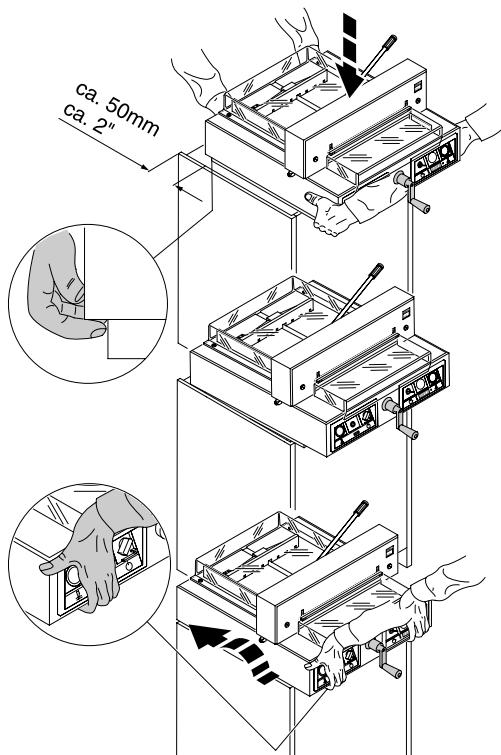

⚠ Danger!
**Do not turn main switch to position "0" whilst
blade is moving upwards or downwards!
Risk of injury!**

**⚠ Danger! Blade must always be covered
by the pressing bar.**

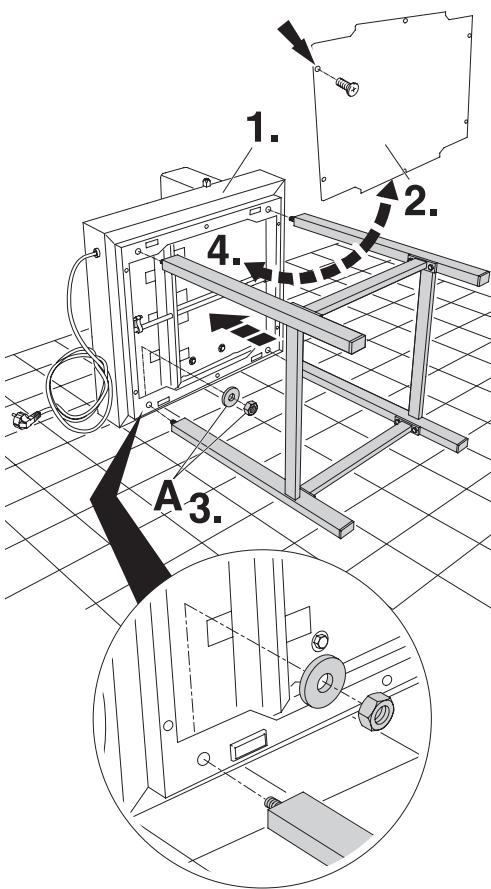

Unpack the cabinet (A), (accessories) or stand (B), (accessories) and assemble according to the enclosed separate instructions.

2 strong people are required to lift the machine onto the cabinet. Beware of fingers!

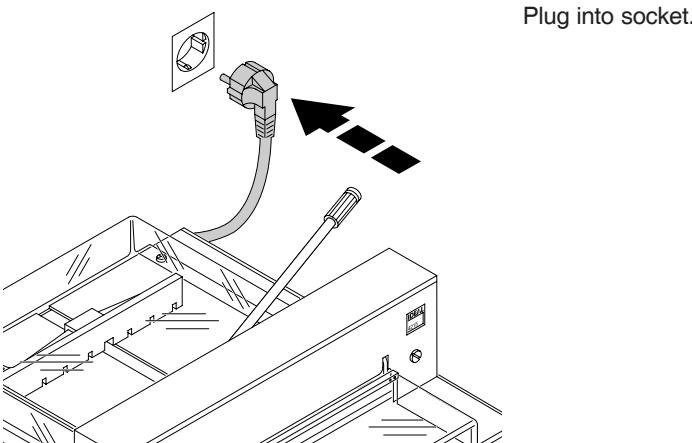

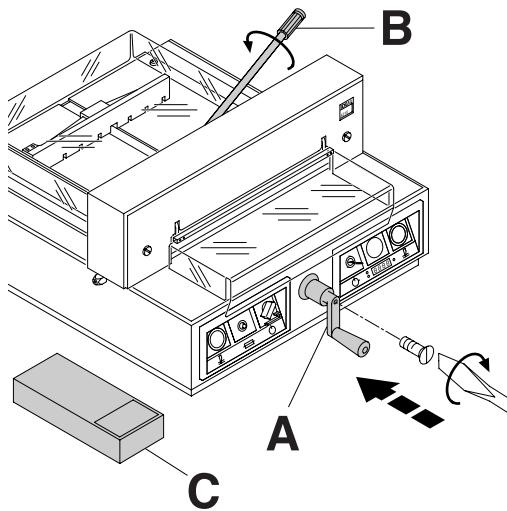

⚠ Risk of injury!

IDEAL 4215

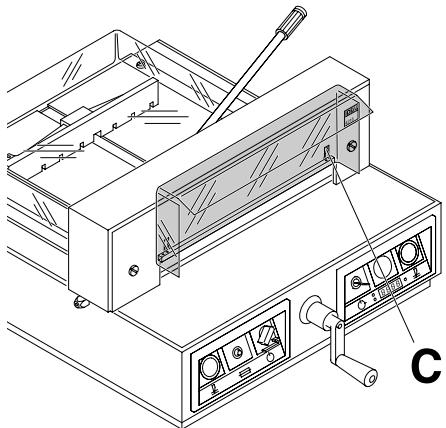

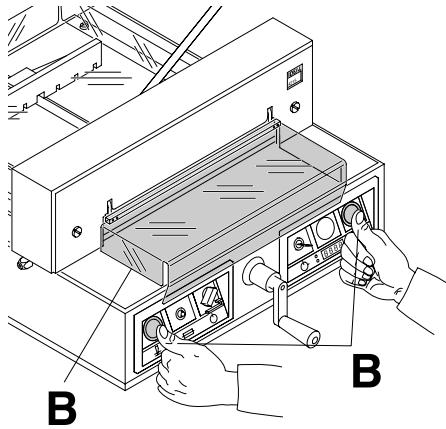

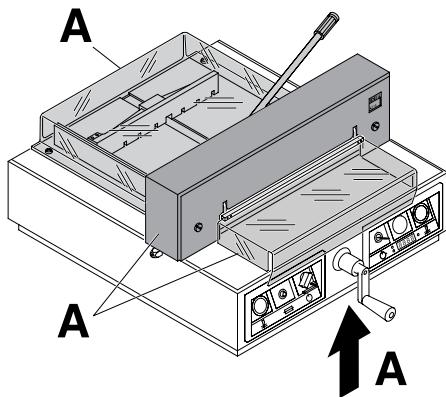

Assembly of stand:

- 2 strong people are required to lift the machine out of the packaging.
- Lay the machine on the floor side wards (1.).
 - Remove the lower cover (2.)
 - Place the cutter correctly onto the machine stand. Fit the 4 washers and tighten the 4 hexagon nuts with a spanner (3.).
 - Screw on the lower cover (4.)
 - Install the machine.

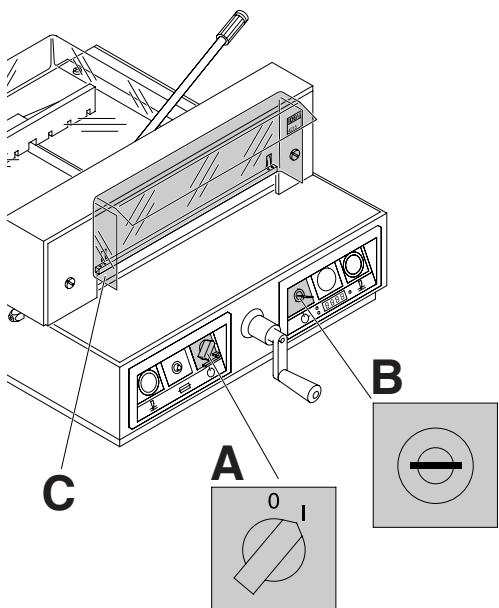

IDEAL 4215

It is forbidden to operate the machine if the operating and safety instructions have not been understood. Please check the safety devices are functioning and complete before use.

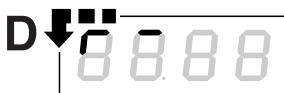

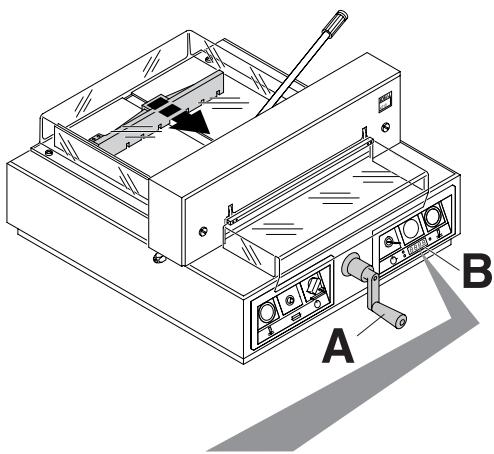

- All covers have to be mounted (**A**).
- The release for cutting is allowed only if the cover is closed and the two-hand safety device is operated at the same time (**B**).
- The front cover should not close by itself. Tighten the hexagonal recess screw right (**C**).

We recommend you keep a record of your test results.

Position the main switch "I" (A)
Insert the key the control system and move it to
the right (B). Open the safety guard (C). The
machine is now ready for use.

IDEAL 4215

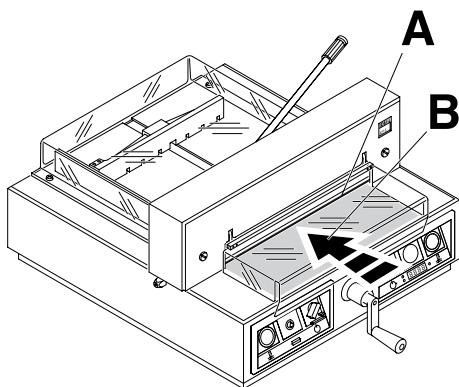

The measurement is set with the backgauge crank. (A) The symbol – rotary direction – → moves to the right on the display (B) (see picture C). The rotary direction of the backgauge crank (A) is indicated on the right. Keep turning the backgauge crank to the right until a measurement appears (see picture E). The reference position is reached.

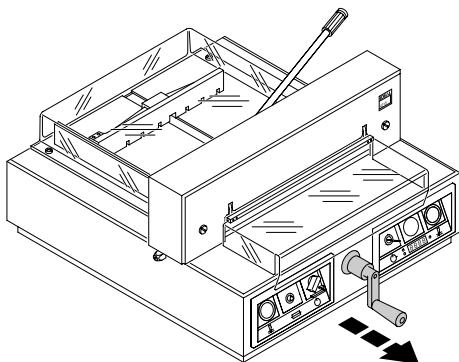

The cutting size can now be set with the handle (A).

If the backgauge is right at the front the symbol – rotary direction – ← will move to the left (see picture D). Turn the backgauge crank to the left until the rotary direction appears on the right → in the display (see picture C). Afterwards turn the backgauge crank to the right until a measurements appears (see picture E). The reference position is reached. The cutting size can now be set with the handle (A).

Measurement is shown on the display in inches or cm (B).

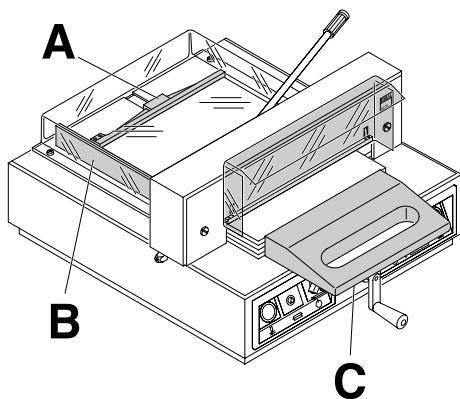

Optical cutting red line (A). Blade cuts on the front edge (B) of the light beam.
(Only use when no exact cut is required).

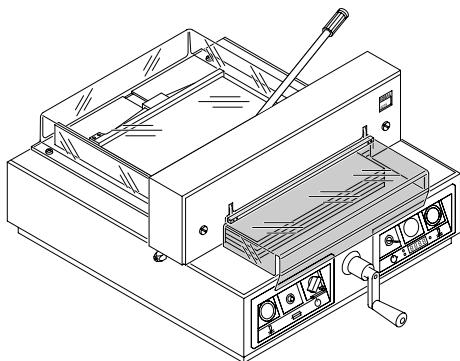

Pull out the handle to avoid the measurement being wrongly adjusted.

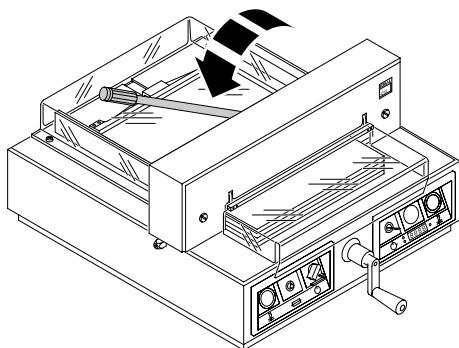

IDEAL 4215

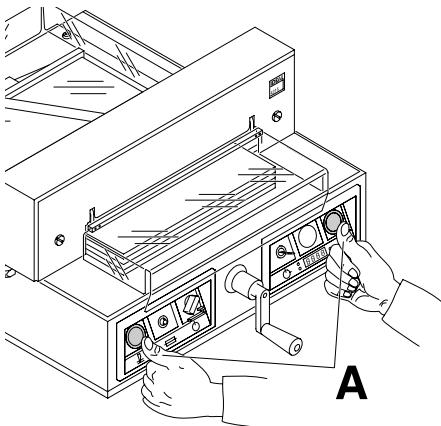

Position the paper on the backgauge (A) and the side lay (B). To move paper stacks, please use the paper knock-up block (C). Run backgauge to the front for turning the paper stack.

Close the safety guard.

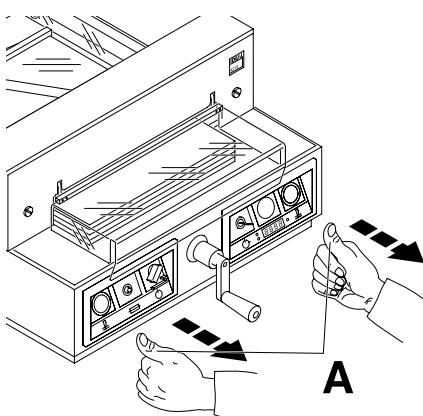

Before every cut the lever must be moved to the left and tightened with light pressure.

Cutting activation:

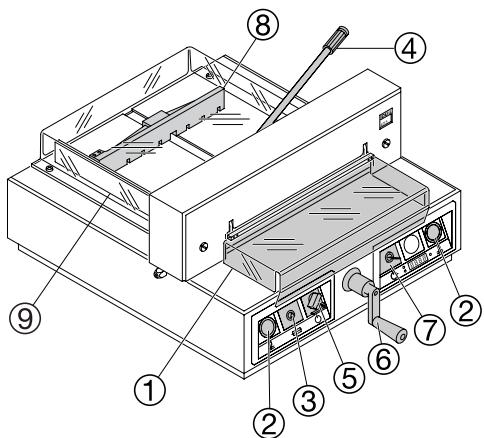

Press both buttons of the two-handed control system (**A**) simultaneously and keep them pressed until the paper is completely cut.

To interrupt or stop cutting:

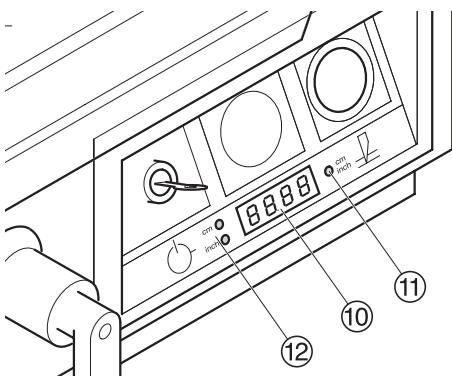

To interrupt or stop cutting, release both buttons (**A**) of the two-hand control.

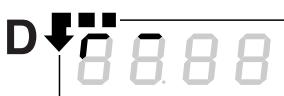

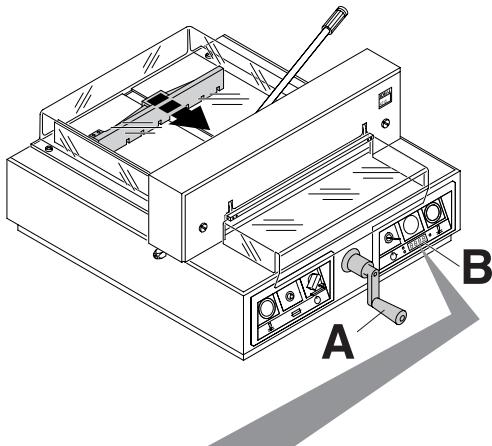

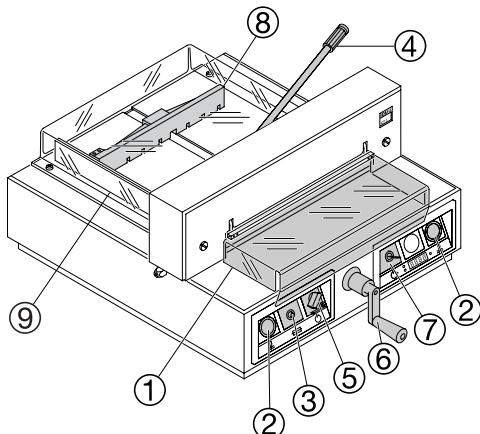

IDEAL 4215

Operating elements

- ① - Front safety guard
- ② - Safety two-handed control system
- ③ - Overload switch blade drive
- ④ - Clamping
- ⑤ - Main switch
- ⑥ - Crank handle for backgauge setting
- ⑦ - Key switch
- ⑧ - Backgauge
- ⑨ - Side lay left
- ⑩ - Display cutting size (cm or inch)
- ⑪ - Changeover cm/inch
- ⑫ - Measuring unit (cm or inch)

Start machine

- Main switch ⑤ to position "I", insert the key ⑦ for the control panel and turn it to the right. Open the front safety guard ①.

⚠ Warning!

Before cutting a measurement please check if the correct scale (cm or inch) is set.

Display in cm or inch

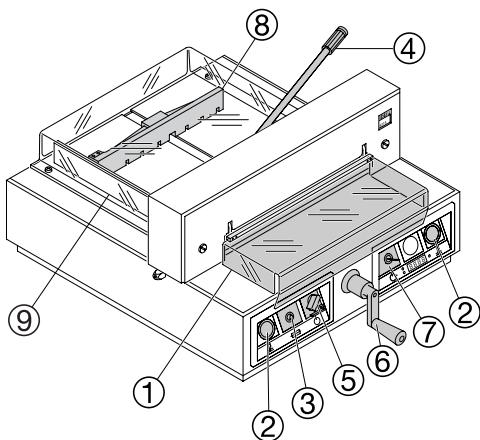

- Press $\cdot \frac{\text{cm}}{\text{inch}}$ → Display changes between cm and inch. For information on how to store see page 20, picture below left.
- The measurement is set with the backgauge crank. (A) The symbol – rotary direction – \rightarrow moves to the right on the display (B) (see picture C). The rotary direction of the (backgauge crank (A) is indicated on the right. Keep turning the backgauge crank to the right until a measurement appears (see picture E). The reference position is reached. The cutting size can now be set with the handle (A).

If the backgauge is right at the front the symbol – rotary direction – \leftarrow will move to the left (see picture D). Turn the backgauge crank to the left until the rotary direction appears on the right \rightarrow in the display (see picture C). Afterwards turn the backgauge crank to the right until a measurements appears (see picture E). The reference position is reached. The cutting size can now be set with the handle.

The measurement scale in cm or inch Y has a LED display.

For information on how to store see page 20, picture below left.

IDEAL 4215

Cutting to specified dimensions

- The cutting size can now be set with the handle ⑥.
- Insert paper and move by means of the stacking angle to the backgauge ⑧ and side lay on the left ⑨.
- Move the pressing lever ④ to the left by a slight swing.
- Close the front safety guard ①.
- Release the cut.

Cut according to markings

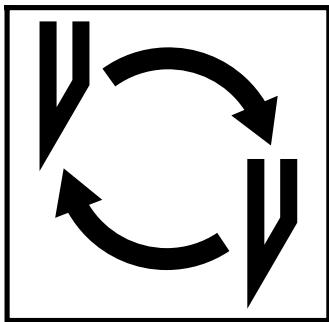

- Adjust the backgauge with the crank handle ⑥ to the back.
- Insert paper and move by means of the stacking angle to the backgauge ⑧ and side lay on the left ⑨.
- Turn crank handle ⑥ to the right until the marking on the paper to be cut is below the cutting line indicator.
- Move the pressing lever ④ to the left by a slight swing.
- Close the safety guard ①.
- Release the cut.

Cutting activation

⚠ Warning!

- Run backgauge to the front for turning the paper stack.
- Do not interrupt the upward movement of the blade by performing switching procedures.
- Close the front safety guard ①.
- Blade must always be at the top and be covered by the clamp. Do not touch the blade
- **risk of injury!** (see security information on page 31).

- Blade and cutting stick replacement •

If the cutting quality decreases:

- Check the cutting depth (see page 31).
- Check the cutting stick (see page 24).
- Replace or grind the blade (see page 23 - 31).

The blade cannot be ground if the blade height is less than 35 mm/1,38 inches. A new blade must be used.

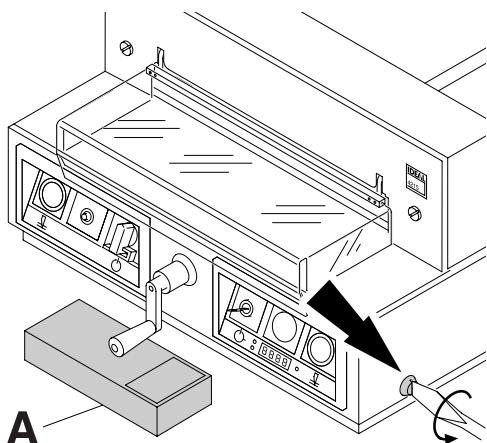

Purchase the new blade from Krug & Priester, D -72336 Balingen only.

The blade may only be ground by a qualified workshop or from the manufacturer Krug & Priester, D -72336 Balingen.

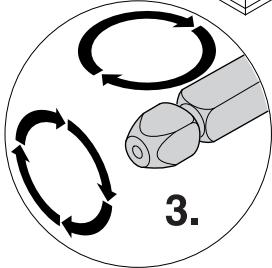

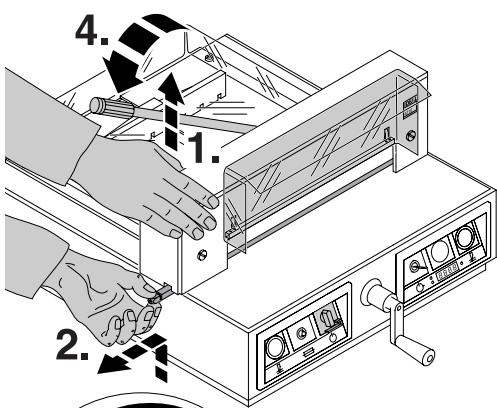

⚠ Danger! Risk of injury!

The blade is extremely sharp. Do not extract or transport the blade without protection. Changing the blade may only be performed by trained staff.

IDEAL 4215

Turn the blade depth adjustment screw to the left until it stops (screwdriver found in tool set (A)).

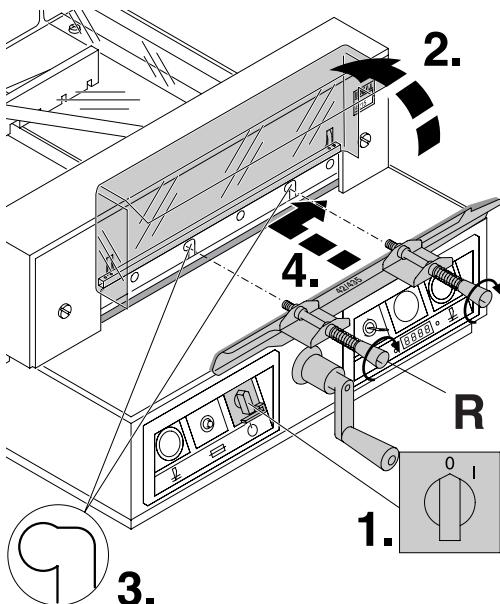

Cutting stick replacement :

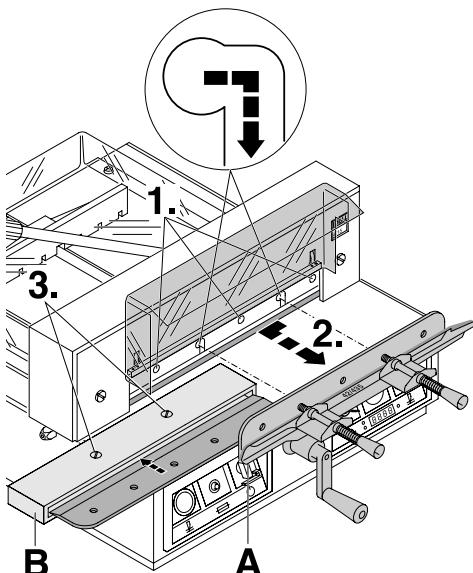

- Lift the cover (1.)
- Lift the cutting stick by hand and pull it out.(2.).
- If needed the cutting stick can be turned or exchanged. (The cutting stick can be used eight times). (3.).

After exchanging the cutting stick **close the clamp by moving the clamp lever to the left (4).**

• Blade and cutting stick replacement •

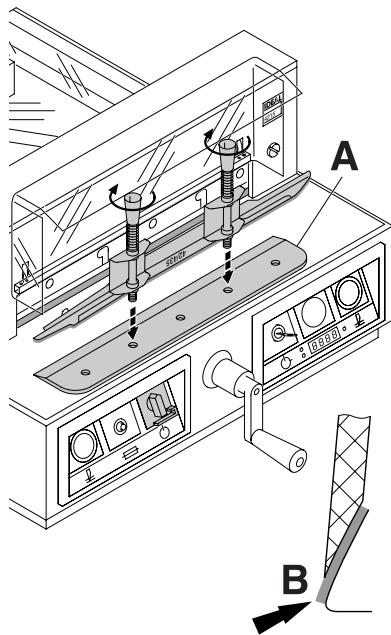

Position the main switch to "0" (1.). Open the safety guard (2.). Remove the 2 blade screws on the elongated holes (3.). Then put the blade changing tool (R) into place and fasten it to the blade (4.).

Remove the remaining 3 screws (1.). Push the blade and blade changing tool (A) to the right and lower to remove (2.). Place the blade into the blade carrier (B) and screw it into place (3.).

IDEAL 4215

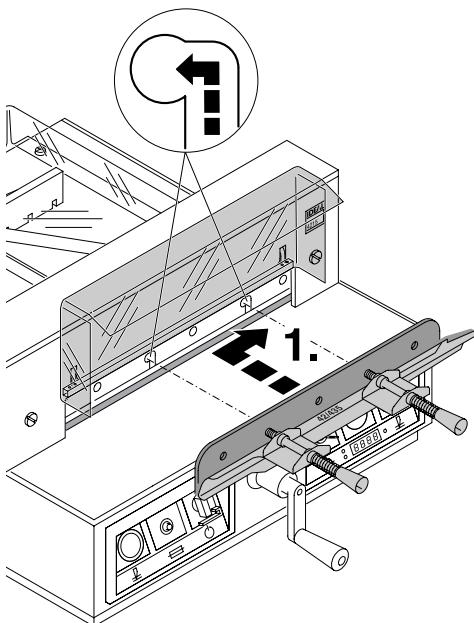

Take the exchange blade carefully out of the blade box and screw it to the blade changing tool (A)

- blade must be covered! (B).

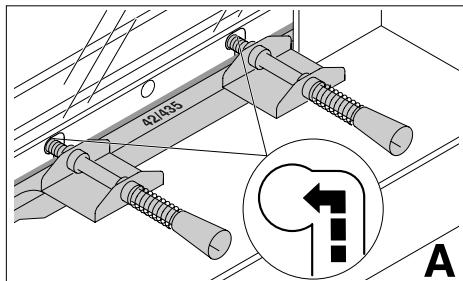

⚠ Danger! Risk of injury!

- Blade and cutting stick replacement •

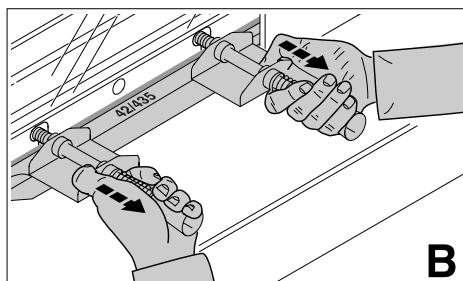

Place the blade to be exchanged, using the blade changing tool, into the blade carrier and push to the top and to the left.(1.) (see picture A) while doing so push both springs back.

It is only necessary to push back the springs if a polished blade is to be exchanged. (see picture B).

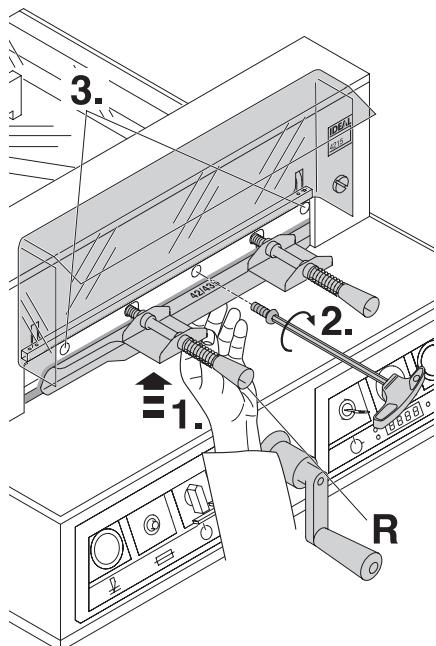

A

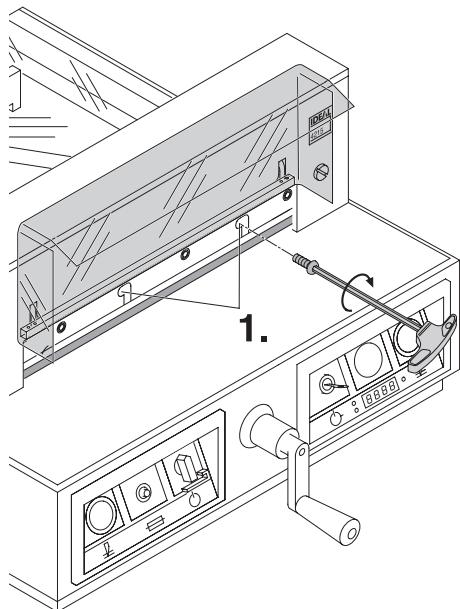

B

IDEAL 4215

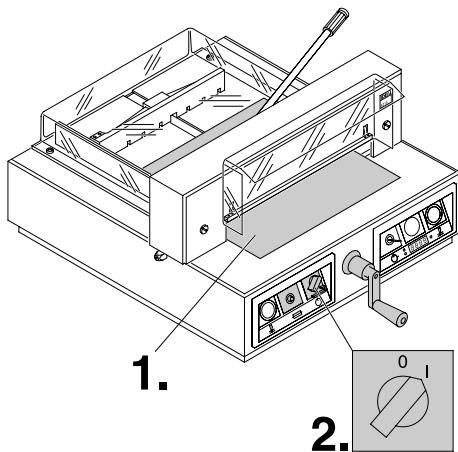

Push the blade changing tool to the top with your hand (1.). First, lightly tighten the middle blade screw with your other hand (2.) and then both blade screws left and right (3.). Remove the blade changing tool (R) (unscrew the grips).

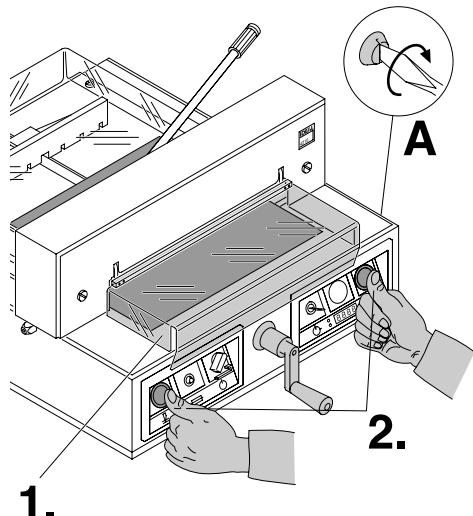

Lightly tighten the 2 blade screws on the elongated holes (1.).

• Blade and cutting stick replacement •

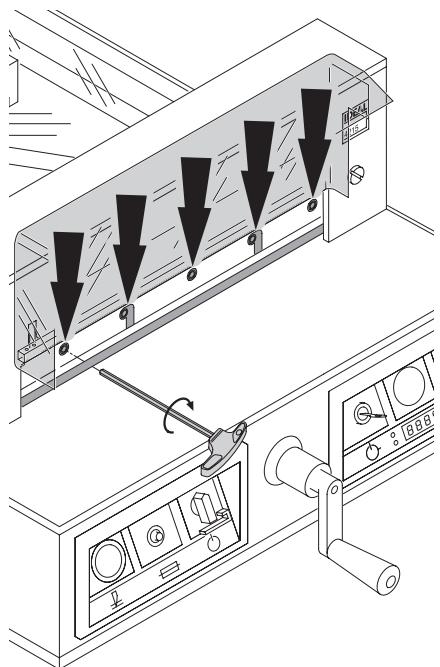

Remove all tools and distribute paper along the entire cutting length (1.).
Turn main switch to position "I" (2.).

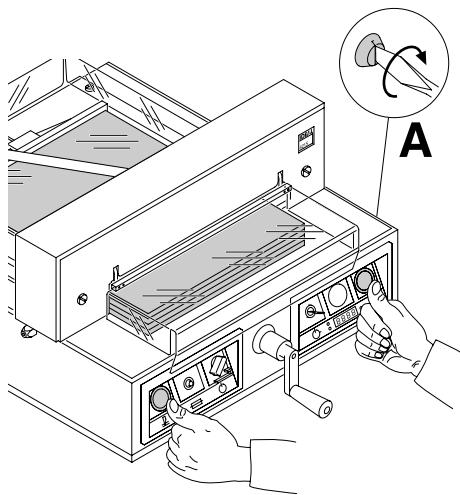

Close the safety guard (1.) Lower the blade by pressing both cutting buttons (2.)
If the last sheet of paper is not completely cut, gradually turn the knob for blade-depth adjustment (A) $\frac{1}{4}$ turn to the right until the paper is cut along the entire length.
(1 turn = 1,5 mm)

IDEAL 4215

Tighten all 5 blade screws.

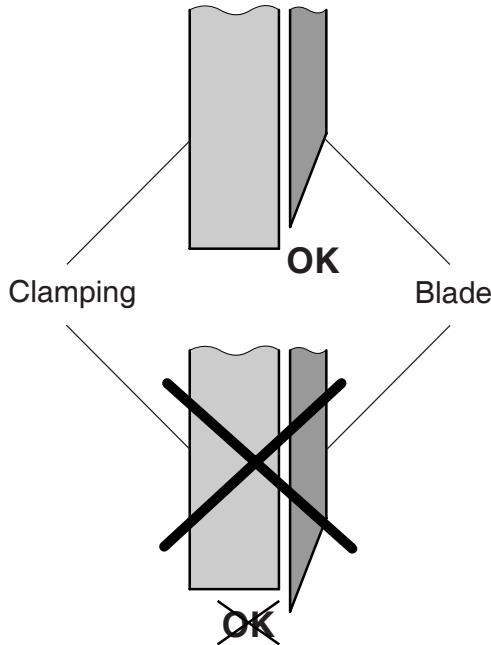

• Blade and cutting stick replacement •

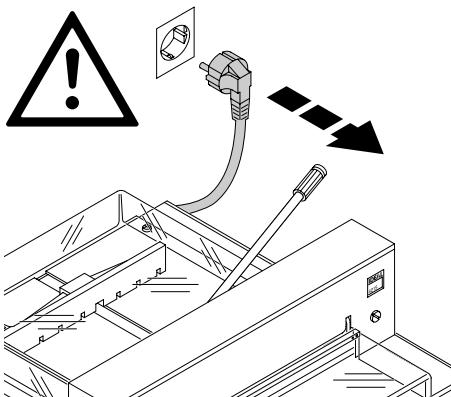

Paper cutting test. If the last sheet or several sheets are not completely cut, gradually turn the knob for blade depth adjustment (**A**) $\frac{1}{4}$ turn to the right until the paper is cut along the entire length. Do not set too low as blade will become blunt sooner.

⚠ Danger! Do not turn main switch to position "0" whilst blade is moving upwards or downwards!
Risk of injury!

⚠ Danger! Blade must always be covered by the pressing bar (see picture below on the left).

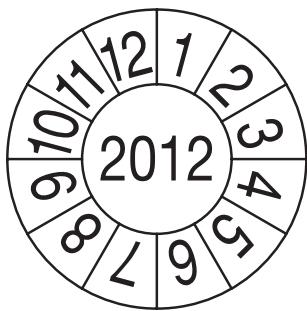

IDEAL 4215

Maintenance work may only be performed by trained staff.

⚠ Danger! Disconnect the mains before starting any service work or before removing the cover.

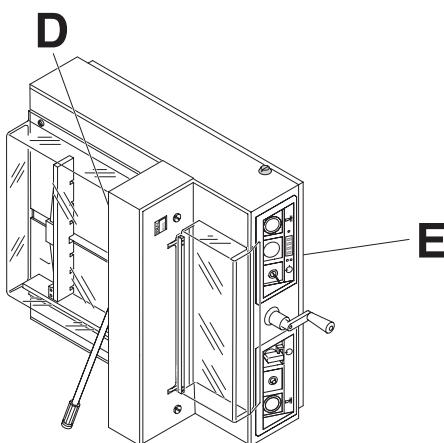

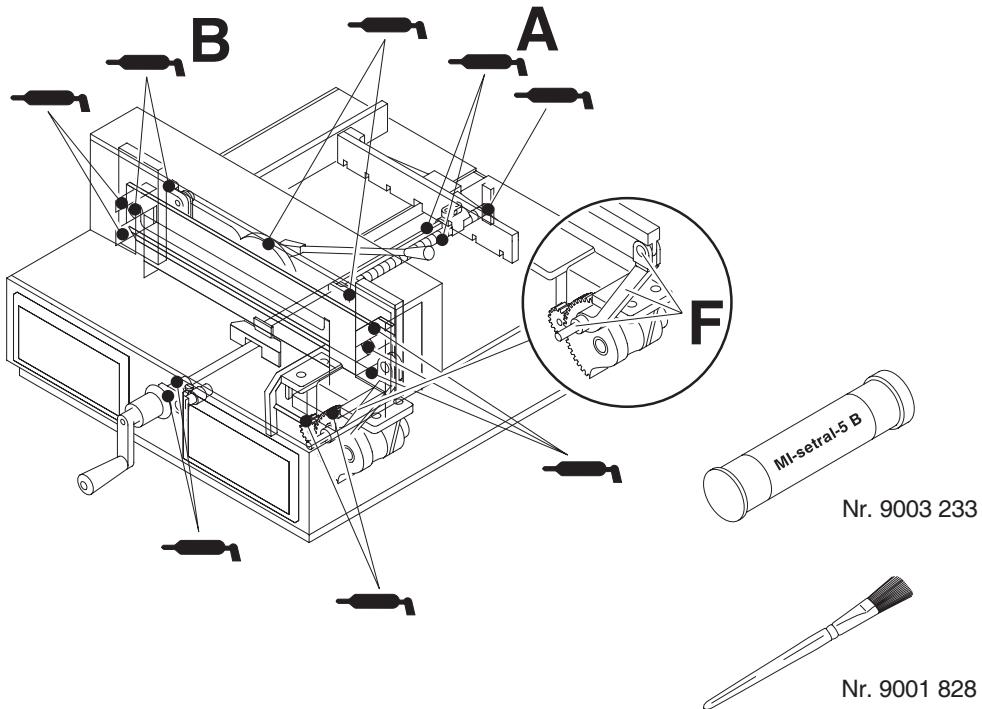

Safety test

The safety regulations are according to the regulations of the country where the cutting machine is operated. The manufacturer recommends a safety check is made every 5 years by an authorised service team.

- Blade and cutting stick replacement •

 = Greasing points on the machine.

Grease the backgauge (A) control weekly.
(Use non-resinous grease).
Grease the remaining parts (B) twice a year
(see picture).

⚠ Danger! Disconnect the mains before starting any service work or before removing the cover.

Put the machine on its left side.

⚠ Danger! of tilting!

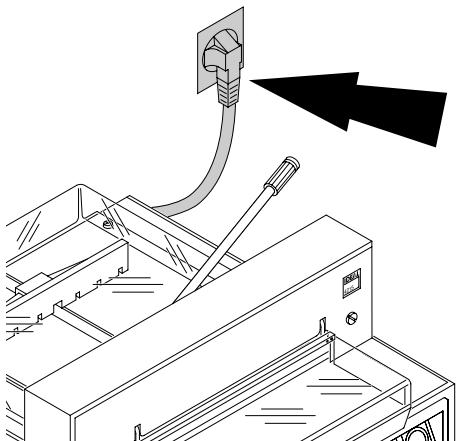

Remove cover (C) and lower panel (D) (tools in tool set).

- Remove remaining paper
- Grease the machine
- **Check the two joining bolts and pushing bar for wear. (F).** If necessary inform your service personnel.
- Mount the machine.

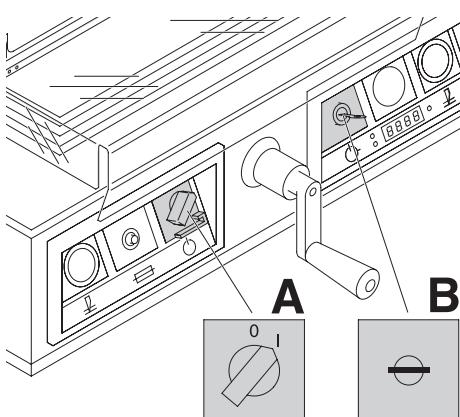

IDEAL 4215

Machine does not function!

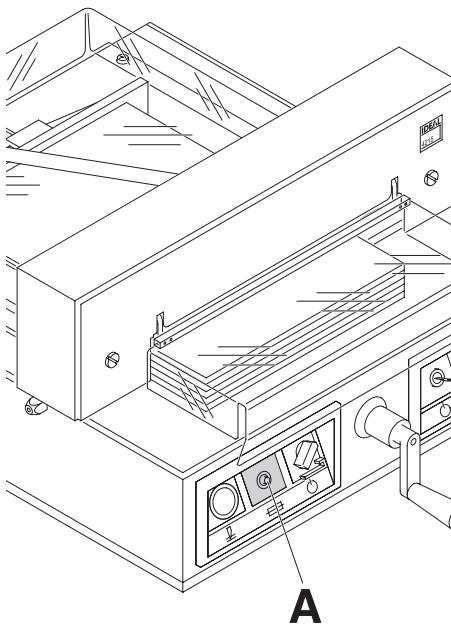

Is the machine plugged in?

Main switch to position "I"? (A)
Control system activated? (B)
(Turn key to the right)
Release a cut see page 19.

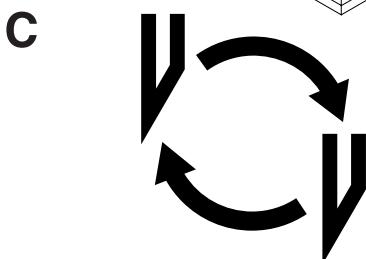

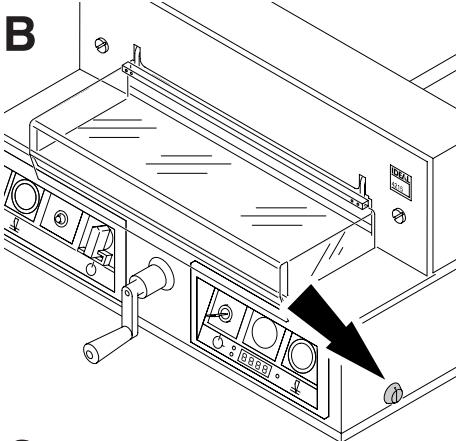

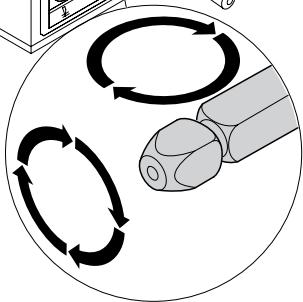

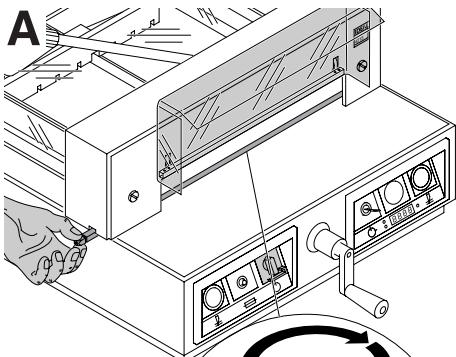

- Possible malfunctions •

Machine turns off:

- Machine overloaded
Safety button (A) ejects.
Allow 1 minute cooling time and reset the safety button (A).
- Machine blocked
- Blade is blunt
Eliminate the cause, and push the safety button (A).

IDEAL 4215

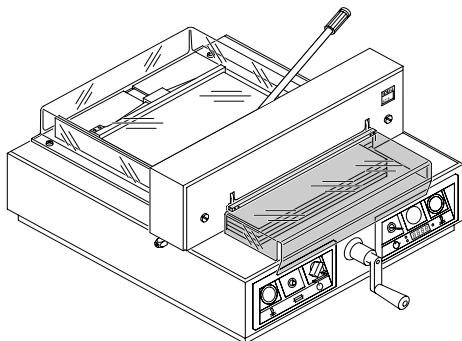

Does not cut through the last sheet:

- Turn or turn around the cutting stick (A), readjust the blade by means of the blade adjusting knob (B).
(See page 31).

Poor cutting quality or blade stays in the paper stack.

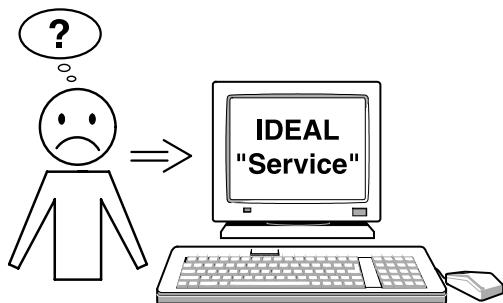

- change the blade (C) (see page 23 - 31).

- Possible malfunctions •

Cut cannot be made.

- If cover is open:
close it.
- If cover is closed:
open and re-close it. (Security check).

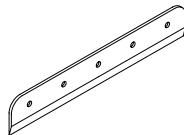

Motor runs but blade does not move downwards.

- Security brake has been activated!
Inform the service team!

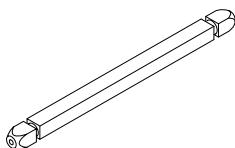

None of the above mentioned methods helped to solve the problem:
