• Safety precautions •

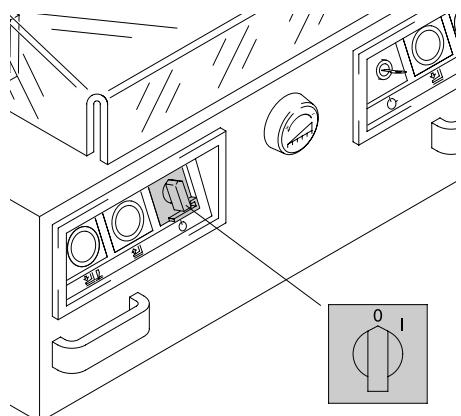

The machine is designed for cutting stacks of paper to a specified size.

This machine is constructed for "one-man operation" only!

⚠ **Warning!** Clips or similar damage the cutting blade.

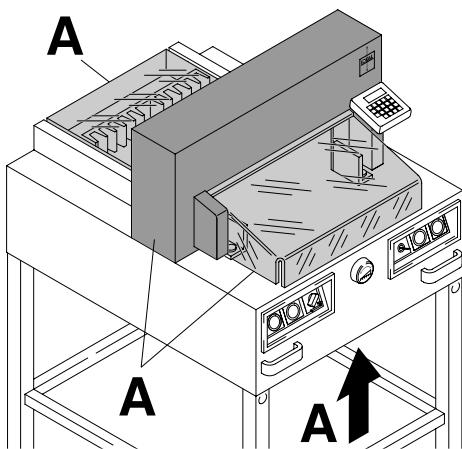

Disconnect from the mains before starting any service work or before removing the panels!

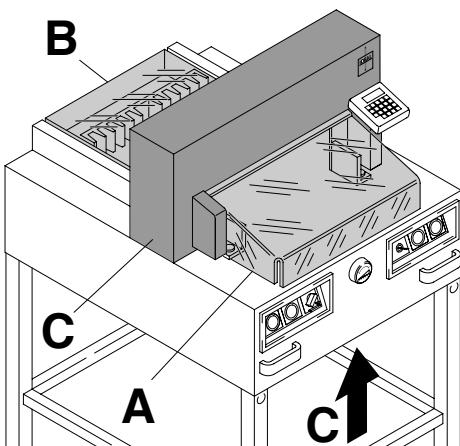

Replacement of blade and cutting stick may be performed only when the main switch is switched off!

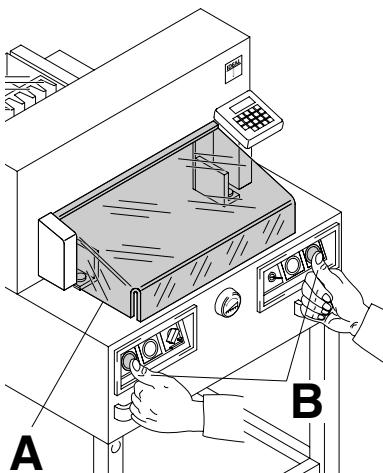

IDEAL 4810-95 • IDEAL 4850-95/EP • IDEAL 5221-95EP • IDEAL 6550-95EP

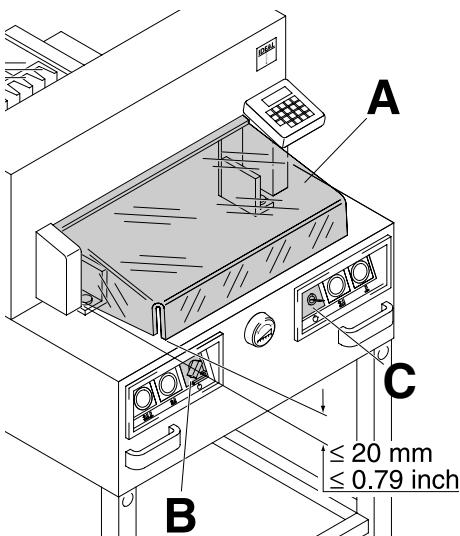

All components which could endanger the operator are covered by a guard!

Operating the machine without safety device is forbidden!  
(Front safety guard (A), rear screwed safety guard (B) and panel (C)).

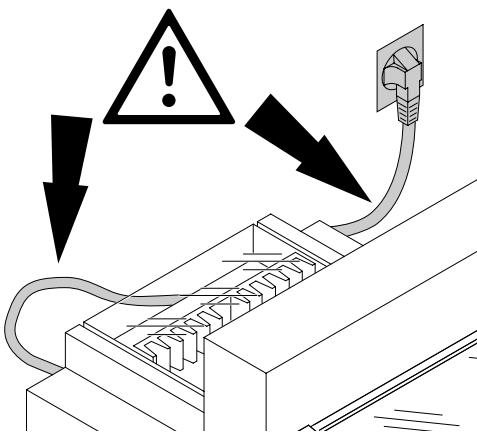

The dangerous cutting movement is safeguarded by a movable guard (**A**) and a safety two-handed control system! (**B**)

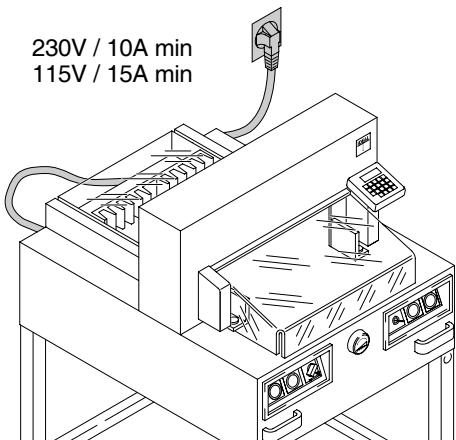

Before working with the machine and after every blade replacement the automatic cut-off function of safety guard (**A**),(correct if distance between cover and table is < 20 mm) main switch (**B**) and control panel (**C**) must be checked.

IDEAL 4810-95 • IDEAL 4850-95/EP • IDEAL 5221-95EP • IDEAL 6550-95EP

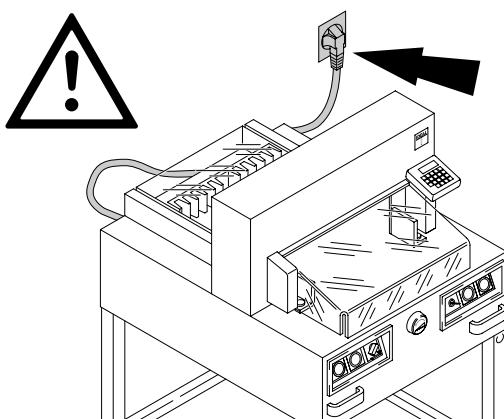

---

Protect mains cable against heat, oil and sharp edges!

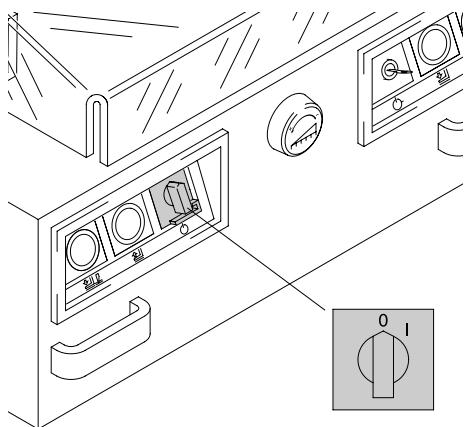

Connect the power cord to a single phase socket.

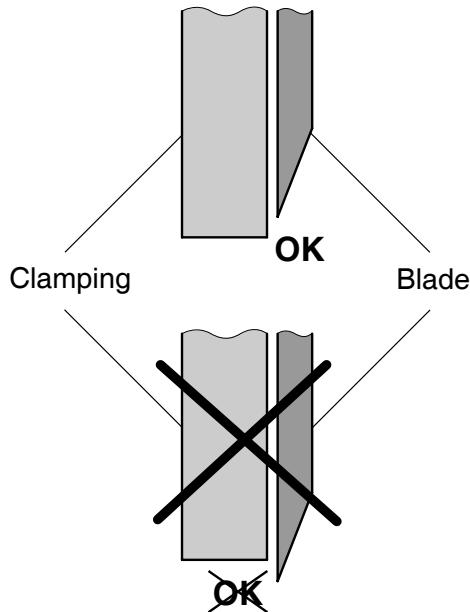

Ensure free access to mains!

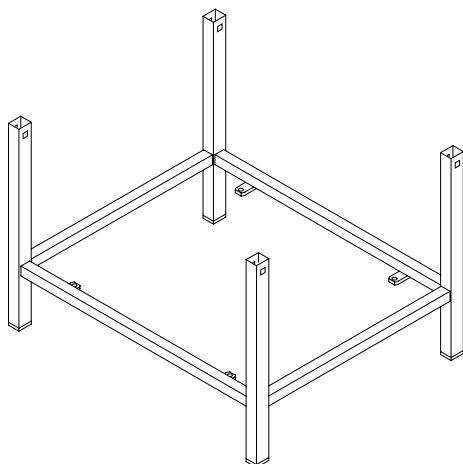

• Safety precautions •

When not in use for a longer period switch off.  
(Main switch to "0").

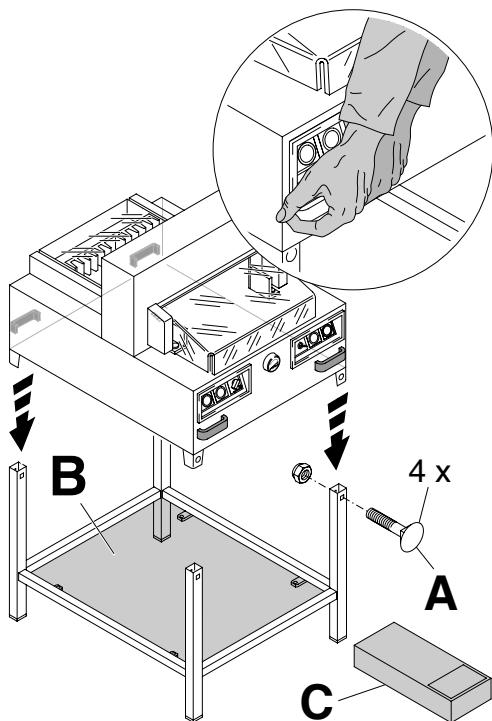

IDEAL 4810-95 • IDEAL 4850-95/EP • IDEAL 5221-95EP • IDEAL 6550-95EP

Only IDEAL 4810-95, IDEAL 4850-95/EP,  
IDEAL 6550-95EP

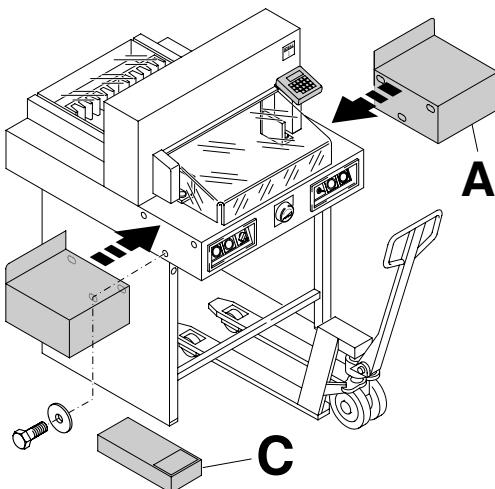

Remove the stand from the wooden pallet.

Only IDEAL 4810-95, IDEAL 4850-95/EP,  
IDEAL 6550-95EP

4 strong people are required to lift the machine  
from the pallet and place it on the stand.

Secure with 4 screws (A). Put the shelf (B) on  
the stand. (Parts and tools are in the tool set  
(C).

### IDEAL 5221-95EP

The machine is delivered ready for operation.  
4 strong people are required to lift the  
machine from the pallet.

Side tables, left and right, (A) are available  
as accessories.

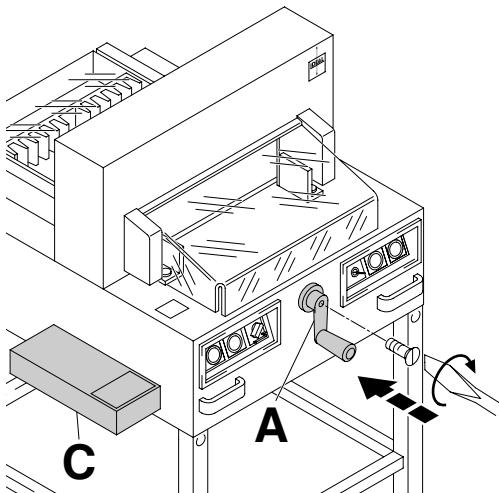

Attach the side tables to the front table so  
that the upper surface is level.

(Screws and nuts are in a plastic bag in the  
tool set (C)).

The front and rear wooden panels must be  
removed for **in-house transport** on a pallet  
truck.

For transport through narrow doors:

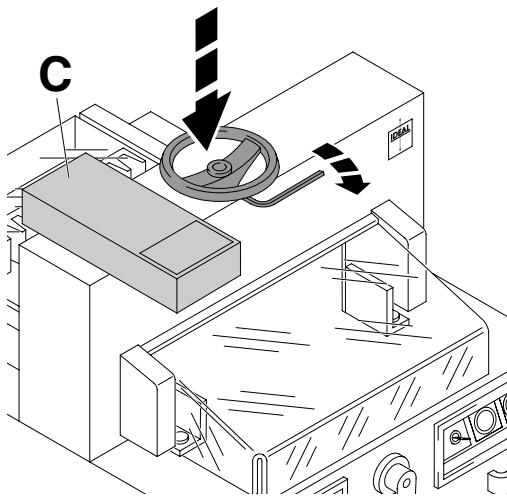

- Remove side tables
- Remove the machine from its base  
(4 screws)
- Tilt the machine on its side
- Mount the machine to its base
- Screw on all side panels

### Only IDEAL 4810-95, IDEAL 4850-95

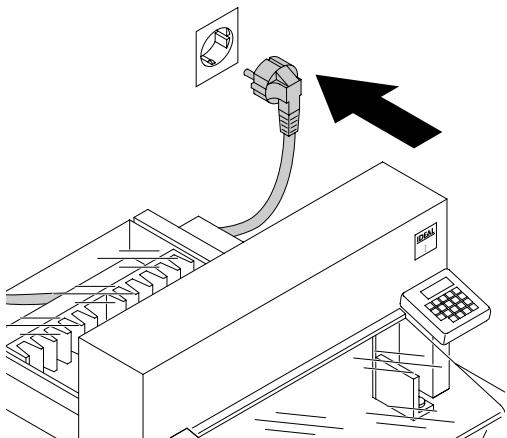

Tighten the backgauge crank (A). Parts and  
tools are in the tool set (C).

**IDEAL 4810-95 • IDEAL 4850-95/EP • IDEAL 5221-95EP • IDEAL 6550-95EP**

**Only IDEAL 4810-95**

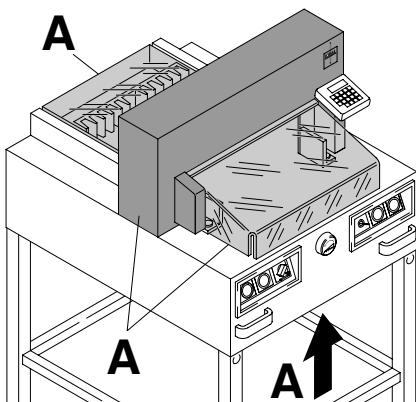

Attach the enclosed hand-wheel for clamping.  
Parts and tools are in the tool set (C).

Plug into socket.

The machine must be connected directly to the  
socket.

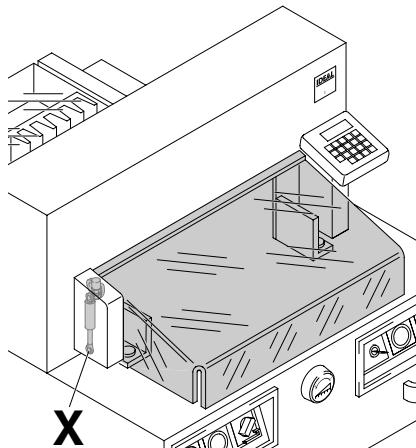

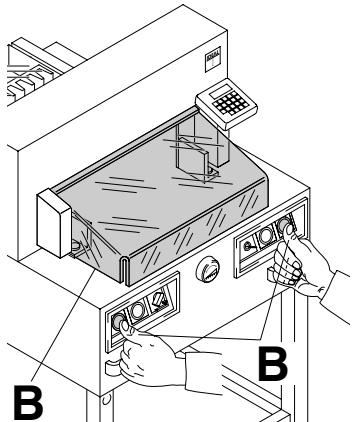

• Operation •

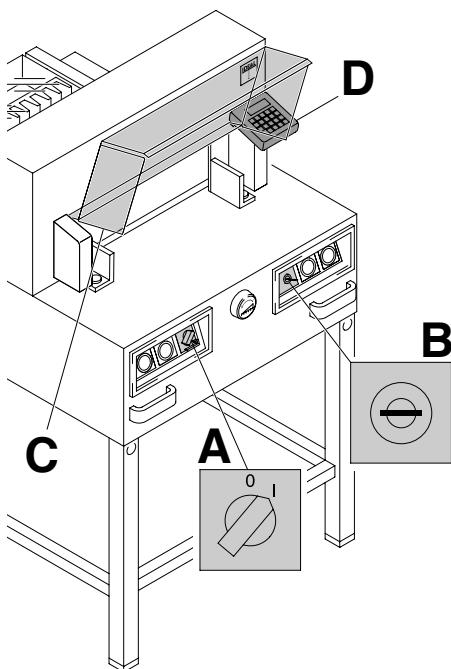

It is forbidden to operate the machine if the operating and safety instructions have not been understood. Please check the safety devices are functioning and complete before use.

- All covers have to be mounted (**A**).
- The release for cutting is allowed only if the cover is closed and the two-hand safety device is operated at the same time (**B**)
- If the front cover closes by itself the gas spring (**X**) needs replacing.

We recommend you keep a record of your test results.

**IDEAL 4810-95 • IDEAL 4850-95/EP • IDEAL 5221-95EP • IDEAL 6550-95EP**

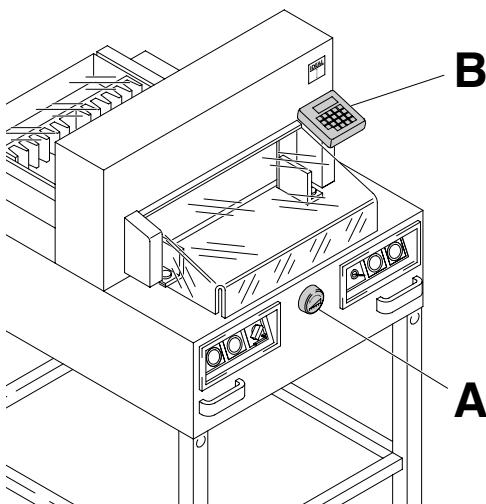

Position the main switch to "I" (**A**). Insert the key for the control system and move it to the right (**B**). Open the safety guard (**C**). The machine is now ready for use.

**Only IDEAL 4850-95EP, IDEAL 5221-95EP,  
IDEAL 6550-95EP**

Press **Start** button (**D**).

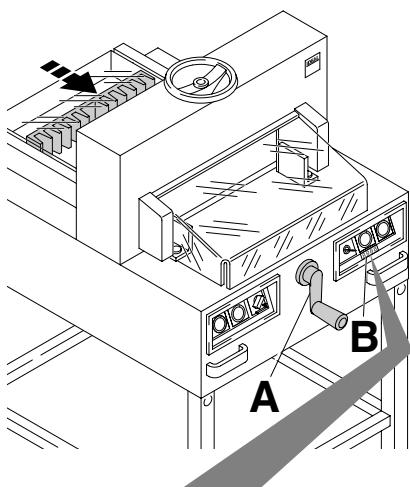

Machine will automatically go to the start position.

**IDEAL 4850-95EP, IDEAL 5221-95EP,  
IDEAL 6550-95EP**

The measurement is set either with the hand-wheel (**A**) or by programming (**B**) the cutting measurements. Measurement is shown on the display in inches or cm (**B**).

• Operation •

**C**

**D**

**E**

### IDEAL 4810-95, IDEAL 4850-95

The measurement is set with the backgauge crank.(A) The symbol – rotary direction – moves to the right on the display (B) (see picture C). The rotary direction of the backgauge crank (A) is indicated on the right. Keep turning the backgauge crank to the right until a measurement appears (see picture E). The reference position is reached.

The cutting size can now be set with the handle (A).

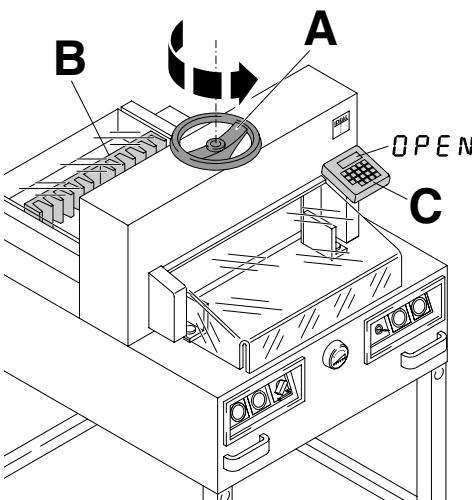

If the backgauge is right at the front the symbol – rotary direction – will move to the left (see picture D). Turn the backgauge crank to the left until the rotary direction appears on the right in the display (see picture C). Afterwards turn the backgauge crank to the right until a measurements appears (see picture E). The reference position is reached. The cutting size can now be set with the handle (A).

Measurement is shown on the display in inches or cm (B).

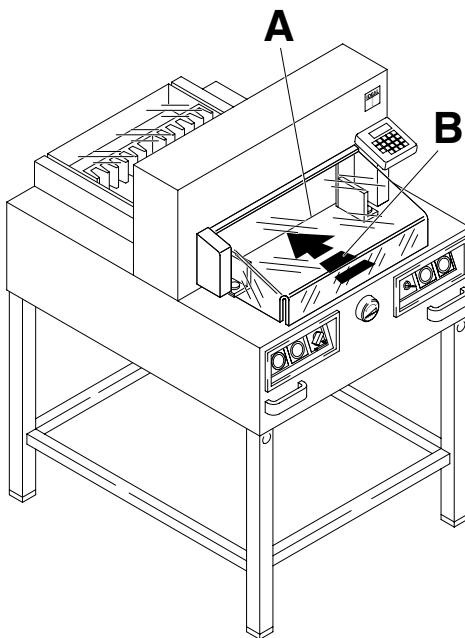

### IDEAL 4810-95

If display (C) shows "OPEN" the clamp must be completely opened.

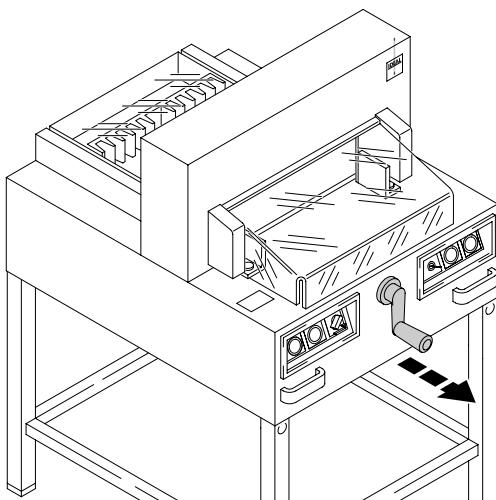

Turn the hand-wheel for clamping (A) completely to the left until the backgauge (B) is activated.

**IDEAL 4810-95 • IDEAL 4850-95/EP • IDEAL 5221-95EP • IDEAL 6550-95EP**

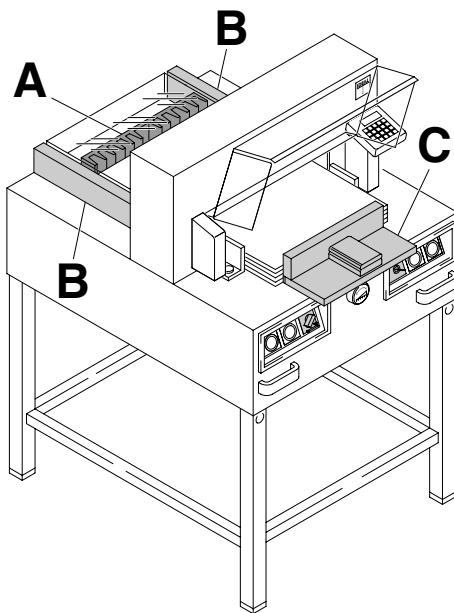

Optical cutting line (**A**) that indicates the exact position of the cut. Blade cuts on the front edge (**B**) of the light beam. (Only use when no exact cut is required).

**Only IDEAL 4810-95, IDEAL4850-95.**  
Pull out the handle to avoid the measurement  
being wrongly adjusted.

• Operation •

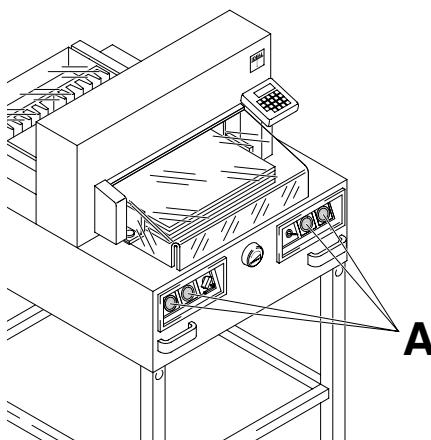

Position the paper on the backgauge (**A**) and side lays left or right (**B**).

To move paper stacks, please use the paper knock-up block (**C**) provided.

(Run backgauge to the front for turning the paper stack).

**IDEAL 4810-95 • IDEAL 4850-95/EP • IDEAL 5221-95EP • IDEAL 6550-95EP**

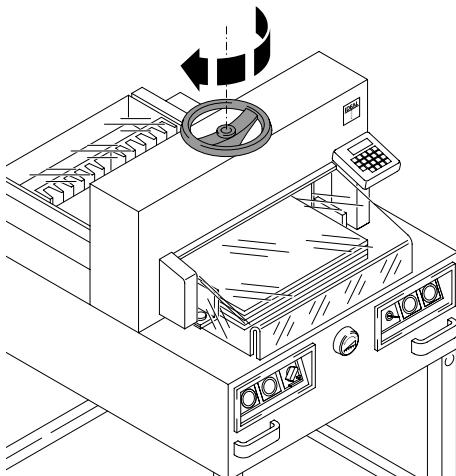

= Pre-clamping

= Clamp returns

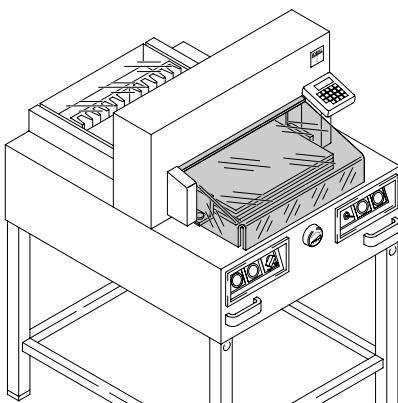

= Cutting sequence with automatic clamping

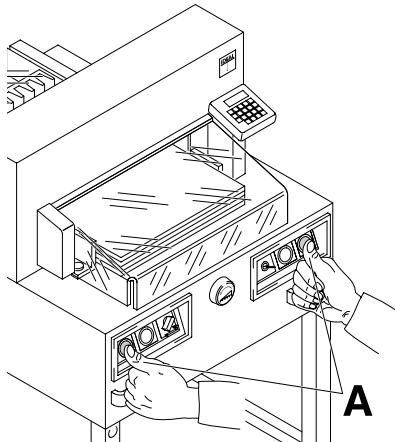

**Only 4810-95**

Clamping is released by the hand-wheel. Before every cut lower the clamp by turning the hand-wheel to the right and tighten with a light twist. The cut is activated by pressing the two buttons exactly at the same time.

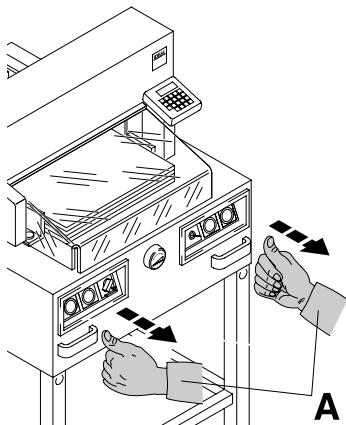

Close the safety guard.

**Cutting activation:**

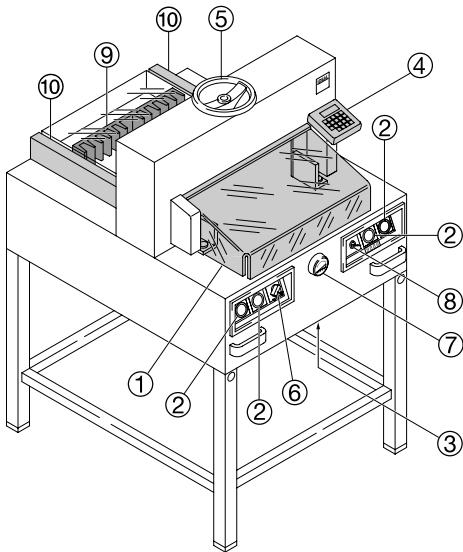

Press both buttons of the two-handed control system activation (**A**) simultaneously and them pressed until the paper is completely cut.

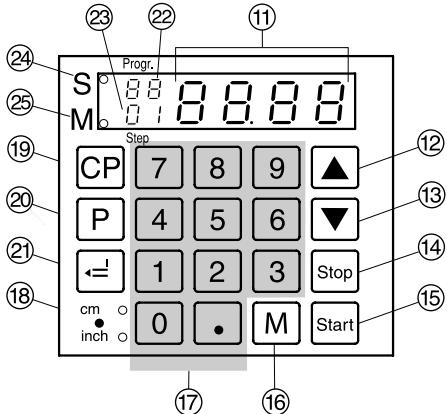

**To interrupt or stop cutting:**

To interrupt or stop cutting, release both buttons (**A**) of the two-hand control.

**C**

**D**

**E**

## IDEAL 4810-95, IDEAL 4850-95/EP, IDEAL 5221-95EP, IDEAL 6550-95EP

### Start machine

- Main switch (6) to position "I", insert the key (8) for the control panel and turn it to the right. Open the front safety guard (1)

### Only by IDEAL 4810-95, IDEAL 4850-95 Cutting to specified dimensions

- The measurement is set with the backgauge crank. (A) The symbol – rotary direction – moves to the right on the display (B) (see picture C). The rotary direction of the (backgauge crank (A) is indicated on the right. Keep turning the backgauge crank to the right until a measurement appears (see picture E).

The reference position is reached. The cutting size can now be set with the handle (A).

If the backgauge is right at the front the symbol – rotary direction – will move to the left (see picture D). Turn the backgauge crank to the left until the rotary direction appears on the right in the display (see picture C). Afterwards turn the backgauge crank to the right until a measurements appears (see picture E). The reference position is reached. The cutting size can now be set with the handle (A).

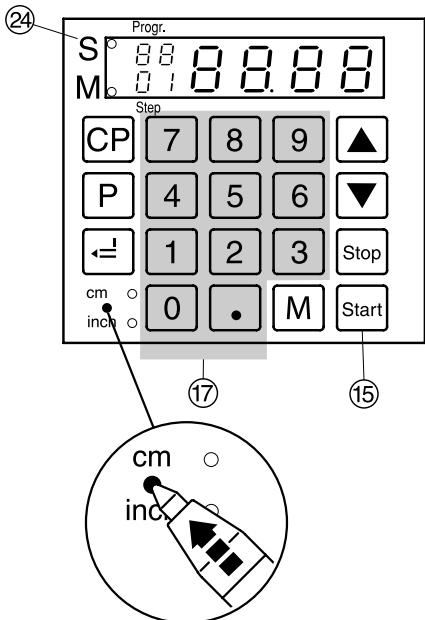

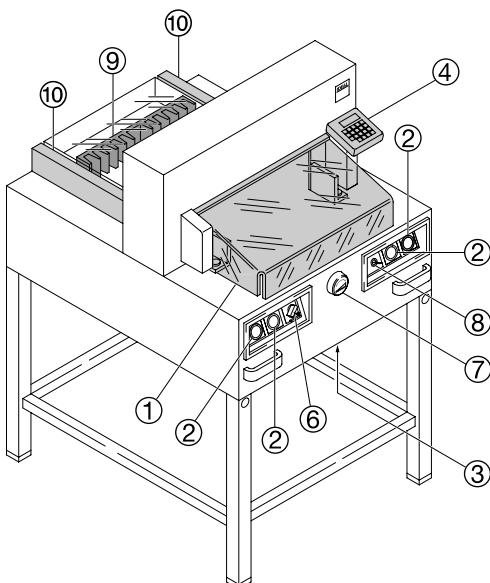

The measurement scale in cm or inch has a LED display (2). For information on how to store see page 22, picture below left.

- Insert paper and move by means of the stacking angle to the backgauge (9) and side lay on the left (10). Turn the hand-wheel (5) for paper clamping to the right and tighten with a short twist.
- Close the front safety guard (1).
- Release the cut.

### Cut according to markings

- Adjust the backgauge with the crank handle (7) to the back.
- Insert paper and move by means of the stacking angle to the backgauge (9) and side lay on the left (10).
- Turn the crank handle (7) to the right until the marking on the paper to be cut is below the cutting line indicator.

## IDEAL 4810-95 • IDEAL 4850-95/EP • IDEAL 5221-95EP • IDEAL 6550-95EP

### IDEAL 4850-95EP, IDEAL 5221-95EP, IDEAL 6550-95EP

#### Start machine

- Main switch ⑥ to position "I", insert the key ⑧ for the control panel and turn it to the right. Open the front safety guard ①
- Press **Start** button ⑯ → backgauge ⑨ moves to the rear and searches for the reference position, wait until a measurement is shown in the display ④.

IDEAL 4850-95/EP = 45 cm, 17,72 inches

IDEAL 5221-95EP = 52 cm, 20,47 inches

IDEAL 6550-95/EP = 61 cm, 24,02 inches

#### ⚠ Warning!

Before storing or cutting a measurement please check if the correct measurement scale (cm or inch) see above is stored. For information on how to store see picture below left.

#### Cutting to specified dimensions

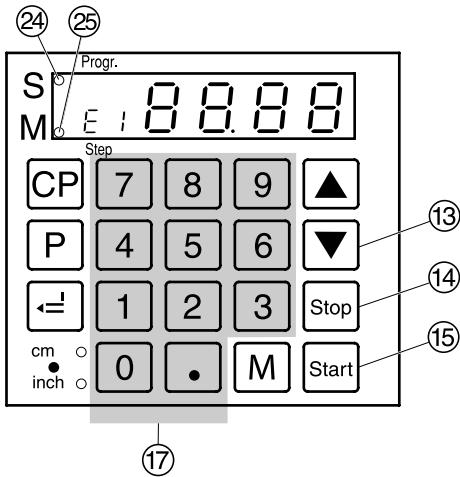

- Enter dimension on the numerical key pad ⑯ → LED "S" ⑭ appears. (If a wrong dimension is entered this can be corrected by pressing the **Stop** button).
- Press **Start** button → dimension is approached, → LED "S" disappears. Dimensions below 9 cm → 3,5 cm (IDEAL 6550-95EP 2,5 cm) can only be approached with the **Start** button pressed and held. (When the **Start** button ⑯ is released, the backgauge ⑨ moves to a measurement of 9 cm → measurement 9 cm blinks, keep the **Start** button pressed, backgauge ⑨ moves to e.g. 7 cm).
- Insert paper and move by means of the stacking angle to the backgauge ⑨ and side lay on the left ⑩.
- Close the front safety guard ①.
- Release the cut.

#### Cut according to markings

- Adjust the backgauge with the hand-wheel ⑦ to the back.
- Insert paper and move by means of the stacking angle to the backgauge ⑨ and side lay on the left ⑩.
- Turn the hand-wheel ⑦ to the right until the marking on the paper to be cut is below the cutting line indicator.

#### Only EP machines.

- The further the hand-wheel ⑦ is turned to the right, the quicker the backgauge moves. If the hand-wheel is turned to the left the backgauge will return quicker.

**Eject function**

If button **▼** (13) is pressed instead of button **Start** (15), after inserting the measurement (17), the backgauge will advance forwards so that paper can be removed. Finally the backgauge moves to the last setting.

**Adjust the eject-dimension**

- Press **P**, hold, and press **M** → **E** on display.
- Insert the desired dimension.  
(Standard is 20 cm).
- **=** Store dimension.
- **P** + **Stop** Escape the program mode.

**Program buttons ▲ and ▼ programs**

Press **P**, hold, and press **▲** (**F1** appears on the display) or

Press **P**, hold, and press **▼** (**F3** appears on the display)

- Enter the desired dimension (For example: 29.7 cm x 21 cm can be entered for DIN A4)
- **=** Store dimension.

**Display in cm or inch**

- Press **inch** → display changes between cm and inch (see page 22 and 24).

**Cutting activation****⚠ Warning!**

- Run backgauge to the front for turning the paper stack.
- Do not interrupt the upward movement of the blade by performing switching procedures.
- Release blade only when LED "S" (24) has gone out.
- Close the front safety guard (1).
- Blade must always be at the top and be covered by the clamp. Do not touch the blade.

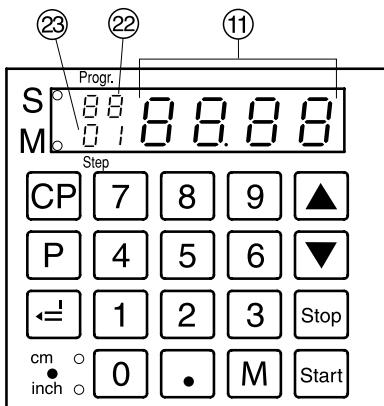

(see safety information on page 38).

**⚠ Risk of injury!****Multiple cut**

- Enter the multiple cut size on the display (17).
  - Advance to the measurement with the (19) button.
  - Push the paper to the backgauge (9).
  - Press **M** button → the red LED "M" (25) light will be on.
  - Enter the multiple cut size.
  - After cutting has been activated press **Start** button.
- Every time the **Start** button is pressed, the backgauge will advance by the multiple cut size.
- Pressing the **Stop** button (14) shows the actual size.

**Exiting program-mode**

- Press **M** button → LED "M" (25) is cleared on the display.

## Programming

**Only IDEAL 4850-95EP, IDEAL 5221-95EP, IDEAL 6550-95EP**

This control system enables you to store 99 programs with 99 programmable steps. One step represents one measurement. After entering the program numbers you are able to change between several program steps with the button **▼** and **▲**.

First figure on display = program number.

Second figure = program step.

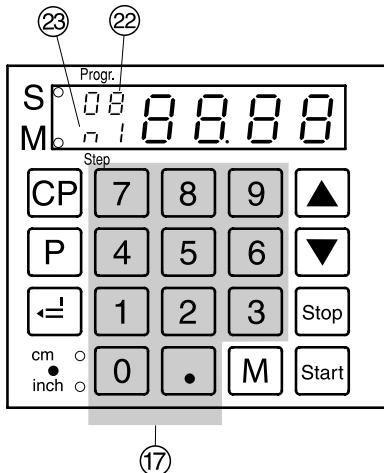

**Dimensions below 9 cm/3,54 inch** can only be approached with the **Start** button held pressed. "UL" on the display → the entered dimension is too low.

"OL" on the display → the entered dimension is too high.

Each program step corresponds to one dimension. The indicated program step can be overwritten at any time. These programs remain stored when the machine is off. Should you change to another dimension unit all programmed measurements are converted into the new unit (cm or inch).

### Entering a program

- Press **P** → PR appears on the display.
- **0 1 ... 9 9** Enter program number 01 ... 99.  
(Top number ② on display = program number).
- If measurement is shown on the display ⑪ the program is reserved.
- Enter dimension, or move the backgauge to the desired measurement with the hand-wheel ⑦.
- **=** Store the dimension → next program step appears ②.
- Enter the next dimension.  
Should an ejection be desired **before** this cut press **P**, hold, and press **M**.
- **=** Store the dimension → next program step appears.
- Should the entered program be required immediately → press **Start** (program is closed).  
Press **Start** again (backgauge moves to the dimension of the first program).  
Or:
- **P** + **Stop** Escape the program mode.

## Eject function program

The eject function can be added each time a measurement is entered and ejects before advancing to the next measurement.

An eject at the end of a program must be programmed in the first step at the program

If the dimension and eject function are stored in the program step the program number appears on the display ②.

## Example of a program eject function

- Press [P], hold, and press [M] eject (*E* blinks) Store the dimension
  - = escape the program mode
  - [P] Stop program 08  
delete previous program  
step 1 on 16,0 cm  
step 2 on 20,0 cm

## How the example works

- **8**
  - **Start**
  - Insert paper
  - Release cut 1
  - Press button
  - Paper is ejected (② blinks)
  - Turn the paper
  - Release cut 2
  -

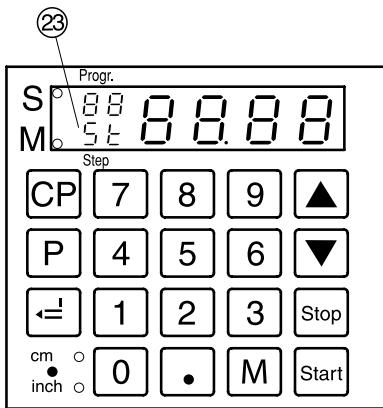

start program 08  
proceeds to position

escape the program mode

## **Programming of multiple cut dimension**

- Press → "Pr" appears on the display.
  - ... Enter program number 01 ... 99.  
Top number on display = program number.  
Lower number = program step.
  - Enter the cut size on the display (17).
  - Store the dimension.
  - Enter multiple cut size.  
Press button  $\cap$  and multiple cut size appears on the display.  
Press button again  $\cap$  .....  $\cap$  .
  - Store the dimension.
  - + Escape the program mode.

Maximum nine multiple cuts can be entered.

#### Cancel a program

- Press **P** → "Pr" appears on the display.
- **0 1 ... 9 9** Enter program number 01 ... 99.
- Press button **CP** twice.  
Each program has to be cancelled separately.

#### Deleting a dimension when programming

Press **Stop** and overwrite the dimension.

#### Choose a program step appears.

Press **P**, hold, and press **M** → **St** **23** lights.  
Enter the desired number of steps (e.g. **0 5**).

#### Change a step

- ▲** → next step
- ▼** → previous step

#### Insert a step

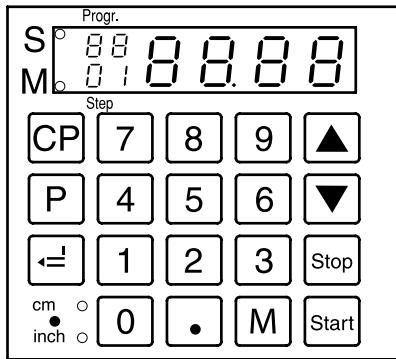

Press **P**, hold, and press **▲** → A new program step is inserted before the displayed program step is shown.

#### Delete a step

Press **P**, hold, and press **▼** → Program step is deleted.

The following number of steps are updated.

## • Operation •

**Working with programs**

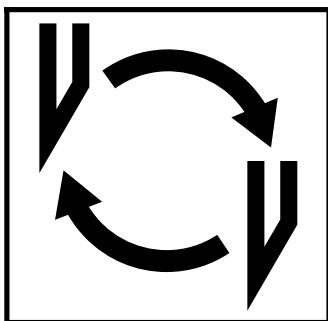

- Press **P** → "Pr" appears on the display
- **0 1 ... 9 9** Enter program number 01 ... 99  
With the button **▼** and **▲** you are able to change between several program steps.
- With **Start** the backgauge moves to the indicated dimension.
- With **Stop** the backgauge stops.

**General**

LED "S" lights → Cut is blocked.  
LED "S" is off → the actual dimension appears.  
In the program mode the ejection of paper **▼** is not possible. The ejection of paper has to be programmed.

**Escape the program mode**

- Press **P** → "Pr" appears on the display.
- Press **Stop** → escape the program mode.

**If the cutting quality decreases:**

- Check the cutting depth (see page 38).
- Check the cutting stick (see page 34).
- Replace or grind the blade (see page 30 - 38).

**The blade cannot be ground if the blade height is less than 83 mm/3,29 inches.**

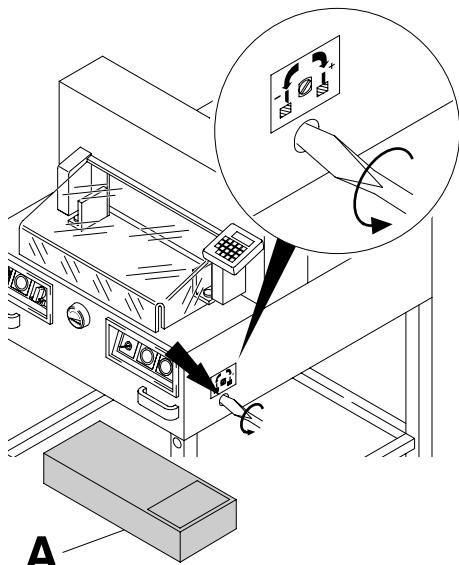

**A new blade must be used.**

The blade may only be ground by a qualified supplier or from the manufacturer  
Krug & Priester, D-72336 Balingen.

**⚠ Danger! Risk of injury!**

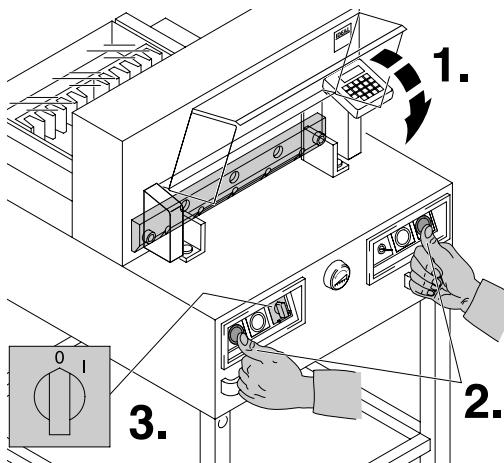

**The blade is extremely sharp. Do not extract or transport the blade without protection. Changing the blade may only be performed by trained staff.**

- Blade and cutting stick replacement •

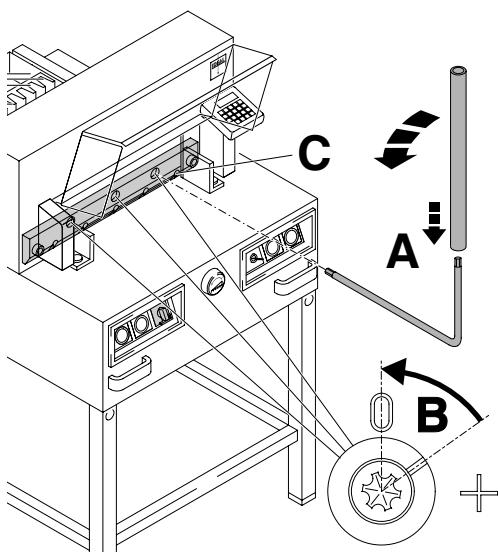

Turn the blade depth adjustment screw to the left until it stops. (Screwdriver found in tool set (A)).

**A**

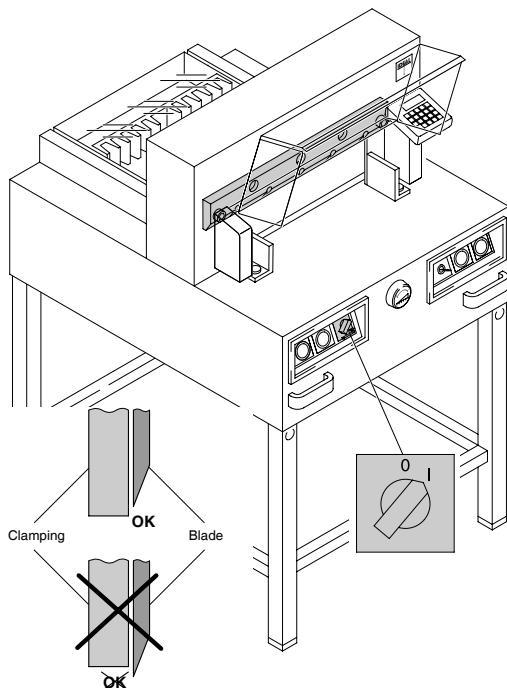

Close the safety guard (1.).  
Lower the blade by pressing both cutting buttons (2.). Keep one button pressed and turn off the main switch (3.).

**IDEAL 4810-95 • IDEAL 4850-95/EP • IDEAL 5221-95EP • IDEAL 6550-95EP**

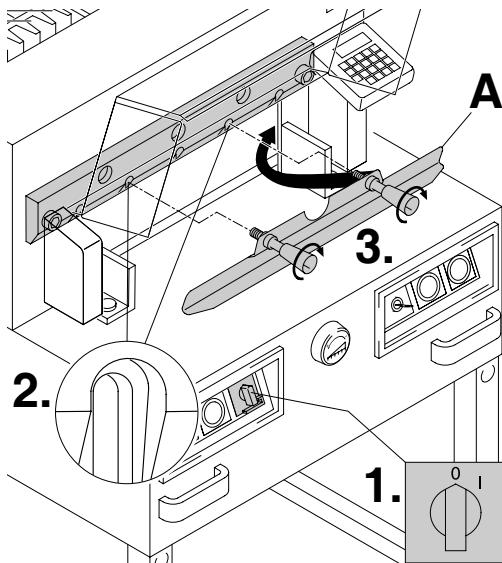

The 3 eccentrics are now exposed and should be turned counter clockwise to position "0" with the special wrench and attachable extension pipe (A) (in the tool set). The slot must correspond to position "0" (B).

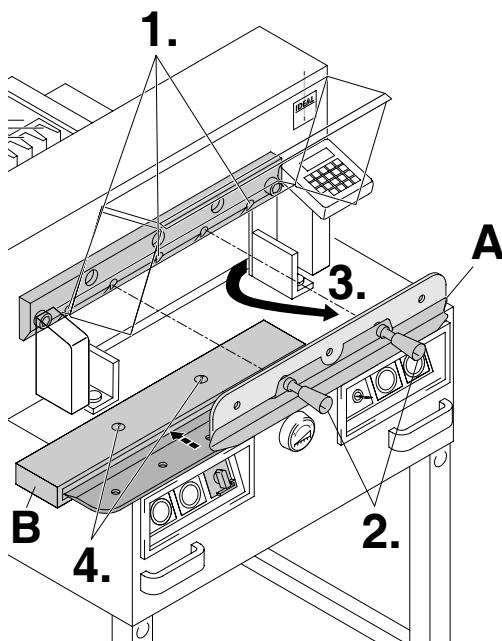

**Only IDEAL 4810-95, 4850-95/EP**  
Unscrew the blade screws (C) on the right hand side.

- Blade and cutting stick replacement •

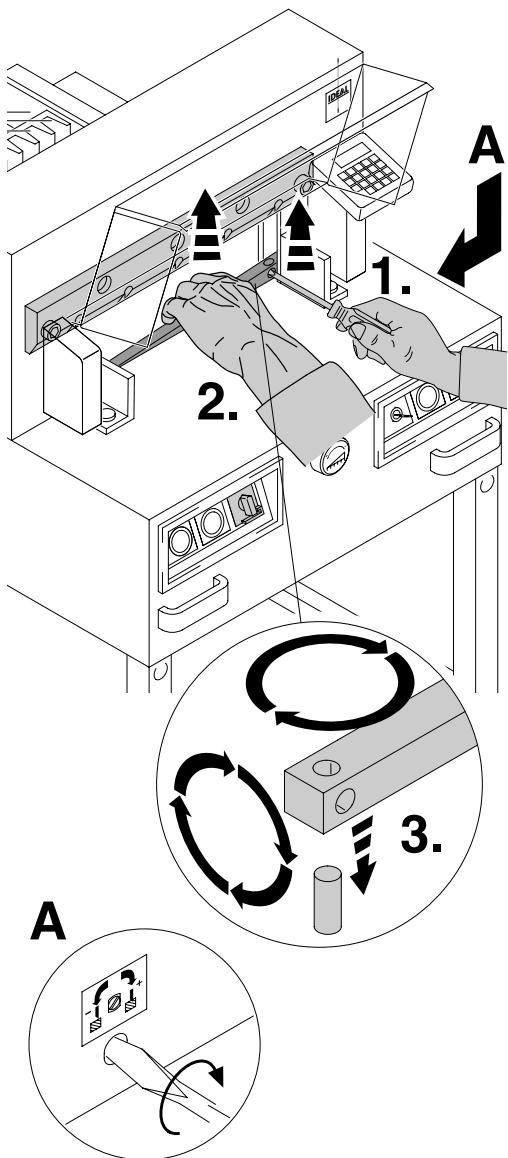

Position the main switch to "0" (1.)  
Remove the 2 blade screws on the elongated  
holes (2.). Then put the blade changing tool (A)  
into place and fasten it to the blade (3.).

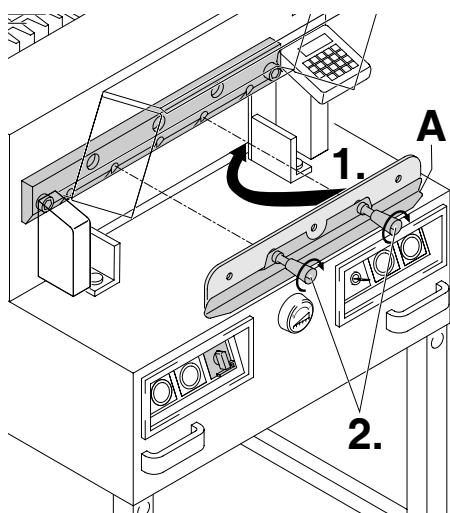

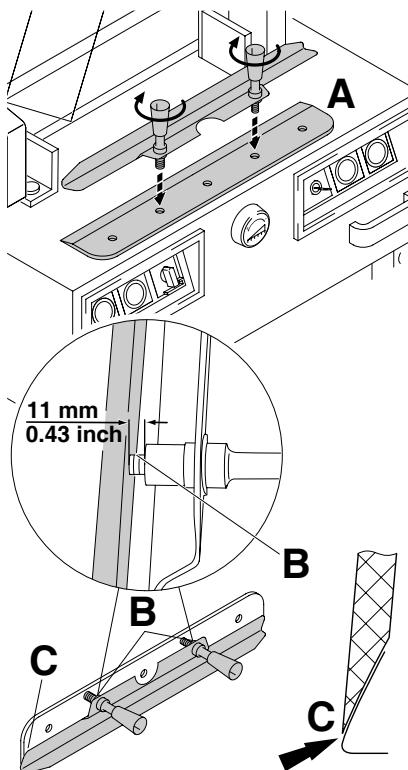

Remove 2 blade screws (1.)  
IDEAL 4810-95, IDEAL 4850-95/EP  
and 3 blade screws (1.) IDEAL 5221-95EP,  
IDEAL 6550-95EP.  
Loosen the grips (2.) of the blade changing  
tool (A) lightly and allow the blade to be taken  
downwards out of the machine (3.). Place the  
blade into the blade carrier (B) and screw it  
into place (4.).

**IDEAL 4810-95 • IDEAL 4850-95/EP • IDEAL 5221-95EP • IDEAL 6550-95EP**

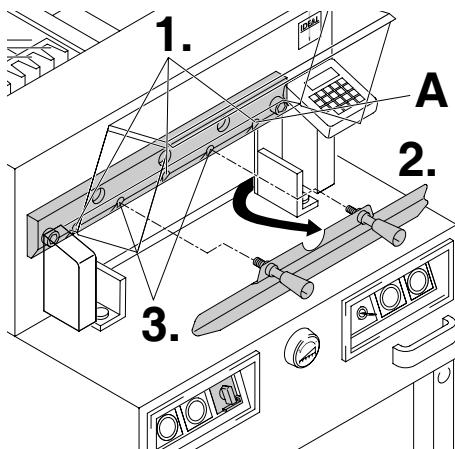

Take out the cutting stick with a small screwdriver. If needed the cutting stick can be turned or exchanged. (The cutting stick can be used eight times).

• Blade and cutting stick replacement •

Place the blade to be exchanged with the blade changing tool (A) mounted (1.), into the blade carrier and push it up to the top and screw it into place with the grips (2.).

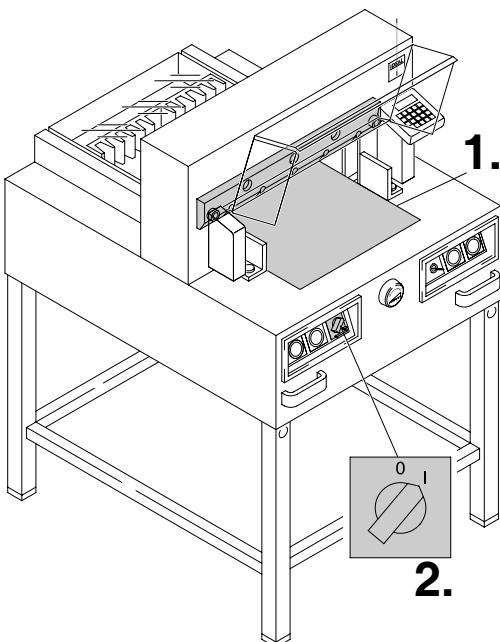

**IDEAL 4810-95 • IDEAL 4850-95/EP • IDEAL 5221-95EP • IDEAL 6550-95EP**

Lightly tighten 3 (IDEAL 4810-95, IDEAL 4850-95/EP has 2) of the 5 blade screws with washers (1.). Remove the blade changing tool (2.). Lightly tighten the remaining blade screws with washers (3.).

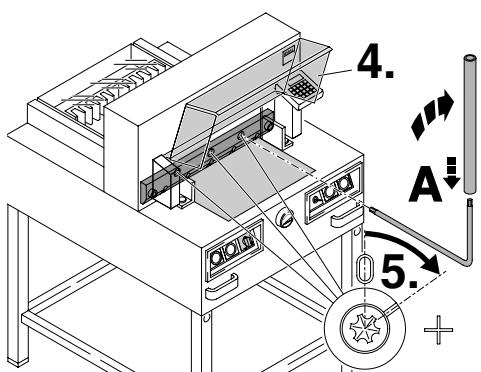

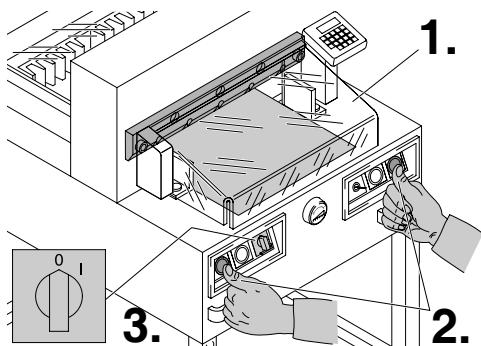

**IDEAL 4810-95 and IDEAL 4850-95/EP**

Lightly screw in the right blade screw with the washer (A) when the blade is lowered.

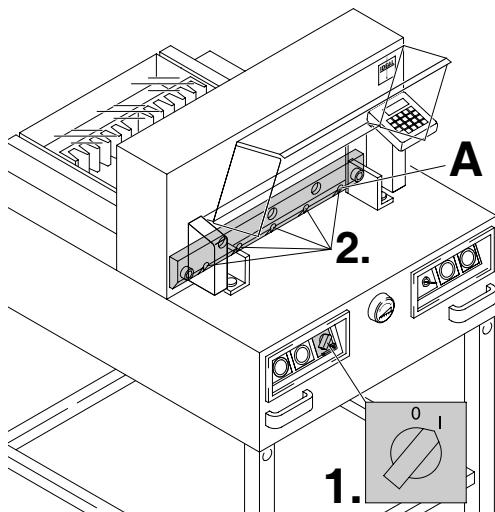

Remove all tools and distribute paper along the entire cutting length (1.). Turn main switch to position "I" (2.).

- Blade and cutting stick replacement •

Close the safety guard (1.). Lower the blade by pressing both cutting buttons (2.). Keep one button pressed and turn off the main switch (3.).

Open the safety guard (4.). With the special wrench (B) the 3 eccentrics should be screwed down (5.) until the paper is cut along the entire length of the blade (The blade must remain parallel, not too deep into cutting stick).

#### Only IDEAL 4810-95 and IDEAL 4850-95/EP

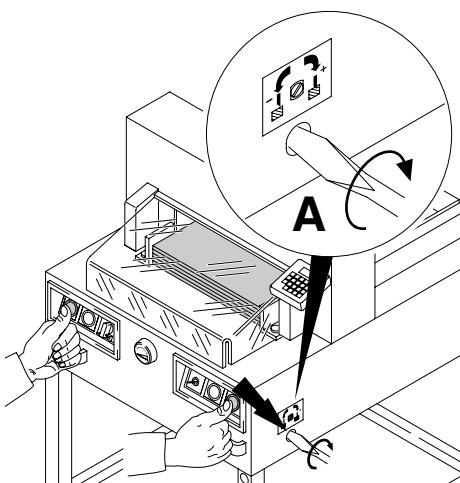

Tighten the blade screws (A) on the right hand side.

Turn main switch to position "I" (1.). Blade will return to upper position. Tighten the blade screws (2.) firmly.

**Warning by IDEAL 4810-95**  
**Do not turn main switch to position "0" whilst blade is moving upwards! The clamp must always overlap the blade!**  
**(see page 38).**

**⚠ Danger! Risk of injury!**

**IDEAL 4810-95 • IDEAL 4850-95/EP • IDEAL 5221-95EP • IDEAL 6550-95EP**

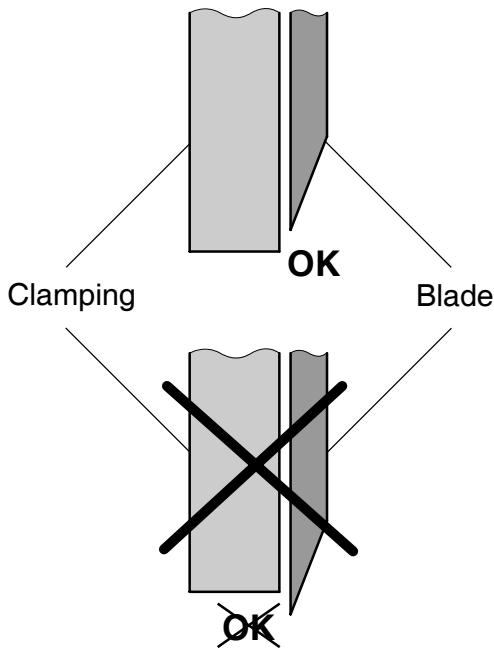

Paper cutting test. If the last sheet or several sheets are not completely cut, gradually turn the knob for blade depth adjustment (A)  $\frac{1}{4}$  turn to the right until the paper is cut along the entire length. Do not set too low as blade will become blunt sooner.

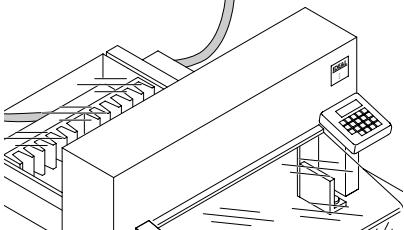

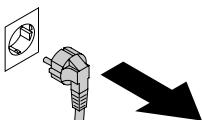

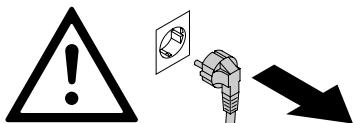

**Warning by IDEAL 4810-95**

**⚠ Danger!**

**Blade must always be covered by the pressing bar (see picture below at the left).**

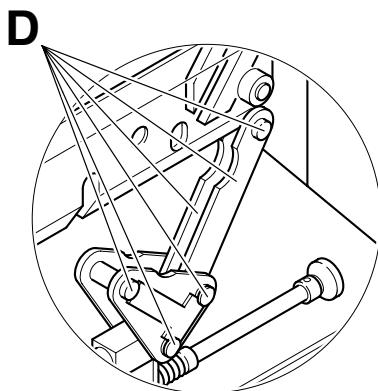

- Maintenance and cleaning •

Maintenance work may only be performed by trained staff.

**⚠ Danger! Disconnect the mains before starting any service work or before removing the cover.**

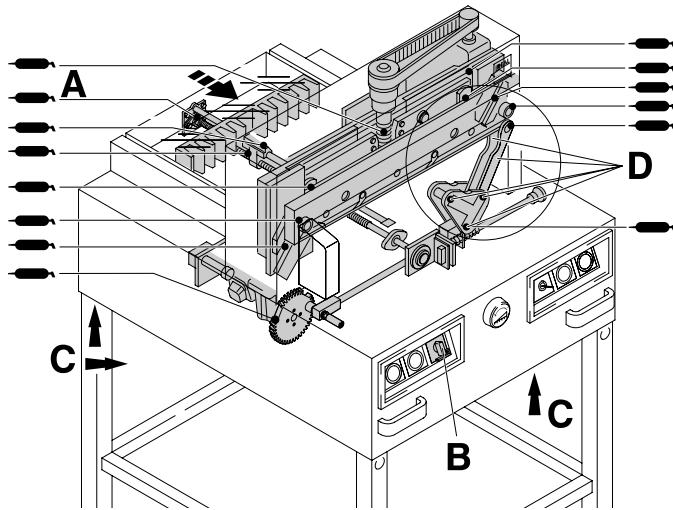

Grease the backgauge (**A**) control weekly with a grease gun. Advance the backgauge as far as possible to the front. (Use non-resinous oil or grease).

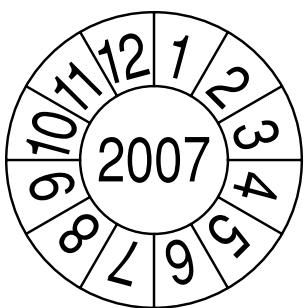

Grease the remaining parts twice a year (see picture).

The main switch must be on "0" (**B**). Remove lower panel and rear wooden panel (**C**). Tools in tool set.

- Remove any paper.
- Grease the machine.
- Check the 4 joining bolts and 2 pushing bars for wear (**D**). If necessary inform your service personnel.
- Mount the machine.

— = Greasing points on the machine.

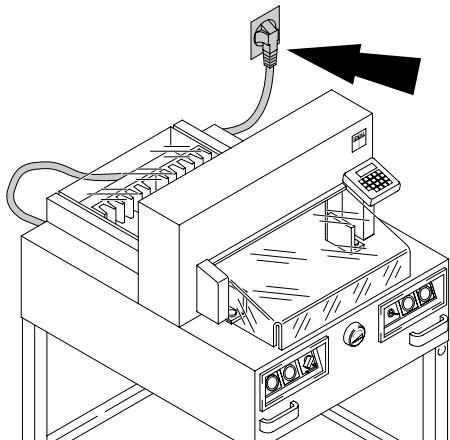

#### Safety test

The safety regulations are according to the regulations of the country where the cutting machine is operated. The manufacturer recommends a safety check is made every 5 years by an authorised service team.

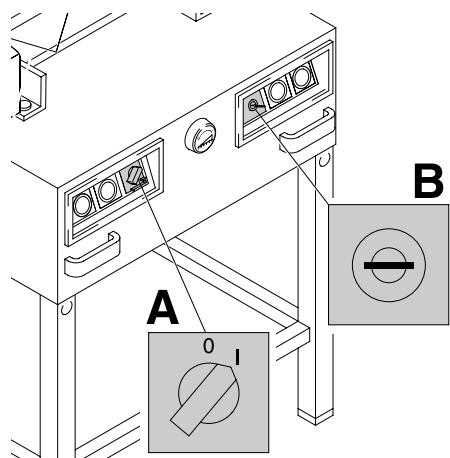

- Possible malfunctions •

Machine does not function!

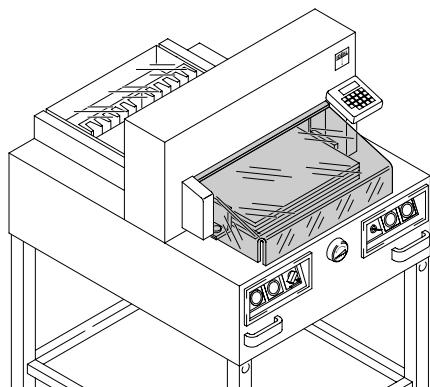

Is the machine plugged in?

Main switch to position "I"? (A)  
Control system activated? (B)  
(Turn key to the right)  
Release a cut see page 21.

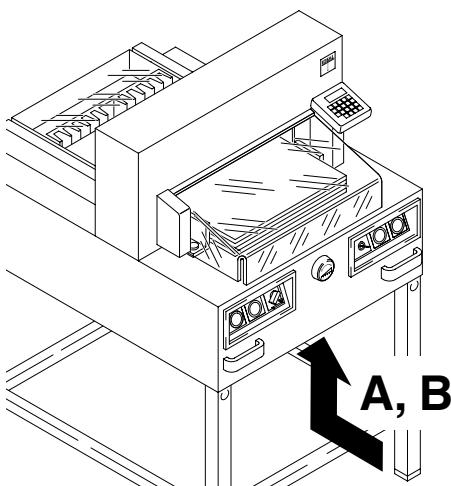

IDEAL 4810-95 • IDEAL 4850-95/EP • IDEAL 5221-95EP • IDEAL 6550-95EP

**Cut cannot be made.**

- If cover is open:  
**close it.**
- If cover is closed:  
**open and re-close it. (Security check).**

- Possible malfunctions •

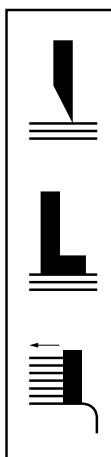

#### Machine turns off:

- Machine overloaded.  
Safety button (A) ejects.  
(Allow 1 minute cooling time and reset the safety button (A).)
- Machine blocked.  
• Blade is blunt.  
Eliminate the cause, and push the safety button (A).

#### Only IDEAL 4850-95EP, IDEAL 5221-95EP, IDEAL 6550-95EP

- Backgauge blocked  
Safety button (B) ejects.  
Eliminate the cause, and push the safety button (B).

#### Safety button for:

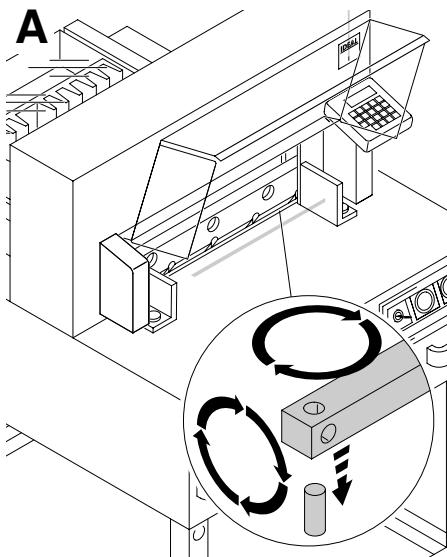

**A = Blade drive**

**A = Clamping drive**

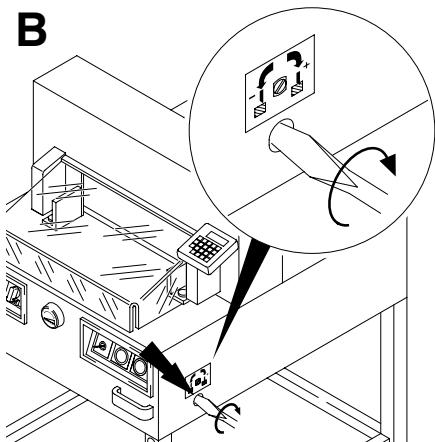

**B = Backgauge drive**

IDEAL 4810-95 • IDEAL 4850-95/EP • IDEAL 5221-95EP • IDEAL 6550-95EP

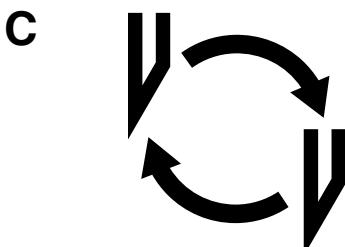

**Does not cut through the last sheet:**

- Turn or turn around the cutting stick (**A**), readjust the blade by means of the blade adjusting knob (**B**) (see page 38).

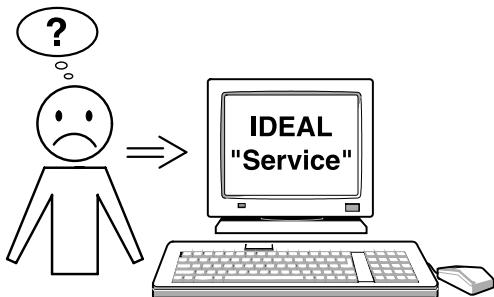

**Poor cutting quality or blade stays in the paper stack.**

- Change the blade (**C**) (see pages 30 - 38).

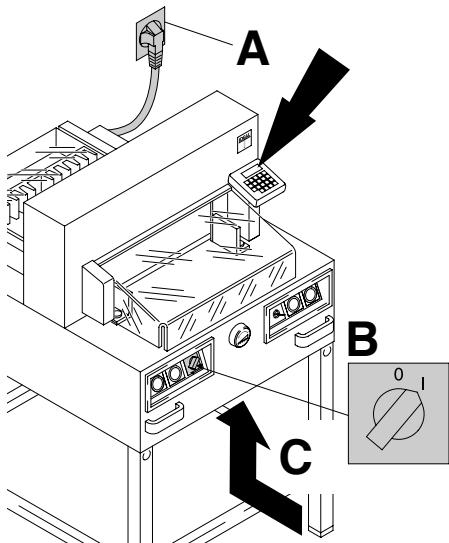

- Possible malfunctions •

### Motor runs but blade does not move downwards.

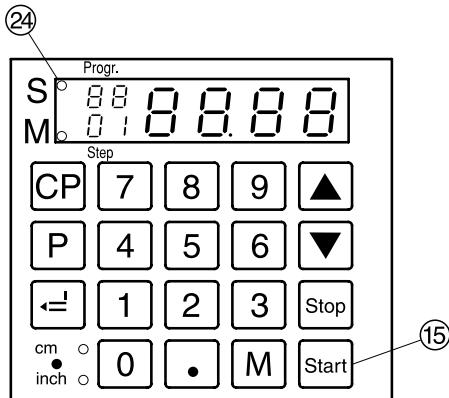

- Security brake has been activated!  
Inform the Service Team!
- [www.ideal.de](http://www.ideal.de) → "Service"  
[service@krug-priester.com](mailto:service@krug-priester.com)

### Display illumination off

- Machine is plugged in? (A)
- Main switch on position "I"? (B)
- Push in the safety button! (C)
- Check the units fuse and the on-site circuit breaker!

**IDEAL 4810-95 • IDEAL 4850-95/EP • IDEAL 5221-95EP • IDEAL 6550-95EP**

**IDEAL 4850-95EP, IDEAL 5221-95EP,  
IDEAL 6550-95EP**

**Cut cannot be made.**

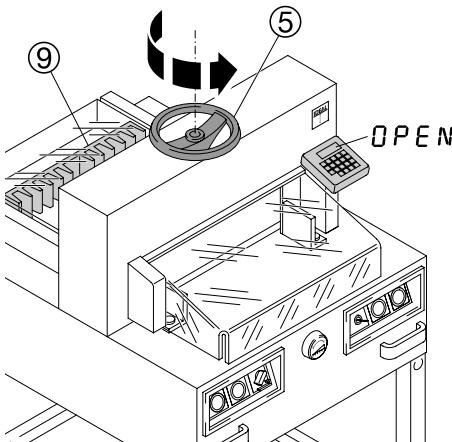

- Measurement has not been reached correctly.

• LED "S" 24 does not turn off.

**Push the button again.**

**Check the security cover (see page 42).**

- Measurement below 9 cm/3,54 inch  
**Hold the button 15 until the measurement is achieved.**

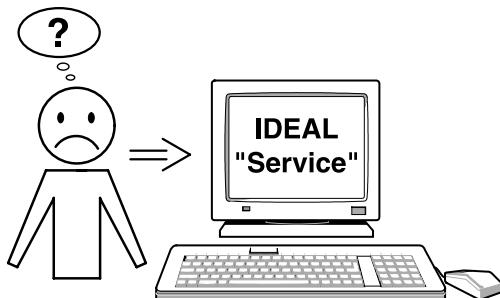

- Backgauge 9 does not move and "OPEN" is shown on the display.

**Open the clamp 5.**

**Turn the hand wheel to the left as far as possible.**

- Backgauge 9 does not advance to position (Hand-wheel has been turned to the left).  
"OPEN" is shown on the display.

**→ inform service people.**

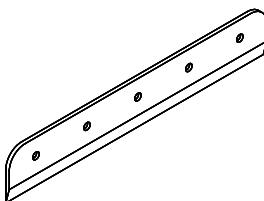

**None of the above mentioned methods helped to solve the problem:**
